

PIKLER LABYRINTH SOLID CUBE

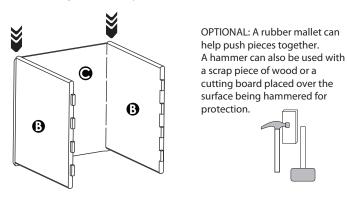

ASSEMBLY GUIDE

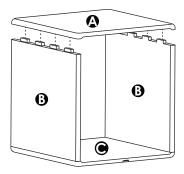

Apply pressure to pop tabs of Sides (3) into slots of Bottom (4). Ensure to orient the Sides so that the tabs are towards the center of the Bottom, as shown. Sides should be flush with outer edge of Bottom.

Flip parts and press or hammer down Sides ③ to tighten until they make contact with the ground. They will be flush with the underside of Bottom ⑤.

 ${f 3}$ Apply pressure to pop Top ${f A}$ over tabs of Sides ${f B}$, as shown.

Flip parts and press or hammer down Sides $oldsymbol{\Theta}$ to tighten until they make contact with the ground. They will be flush with the underside of Top $oldsymbol{\Phi}$.
