Instructions

1 Insert tabs of Shelf Bottom **c** into lower slots of Shoe Shelf Right Side **a**. Double check to ensure that both parts are oriented correctly, according to Diagram 1. Press down to tighten.

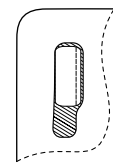

Note: Every tab has a groove on one side. Every slot has an indent. The groove in the tab needs to line up with the indent in the slot to work correctly.

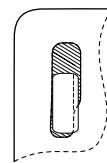

Note: Pressing the tabs together is what creates the Tension Lock. This will require some effort. **STAND UP, POSITION YOURSELF ABOVE THE JOINT AND USE YOUR WEIGHT TO PRESS DOWN.** Lock your arms if you need to for extra force.

The tabs need to be pressed almost to the end, as shown below.

2 Assemble Shelves **d** with Dividers **e** and Center Divider **f** according to Diagram 2. Make sure that Center Divider **f** is placed in between Dividers **e**.

Note: To assemble correctly, align the slots perpendicularly to each other.

3 Place the Shelf and Divider assembly into place, placing tabs into corresponding slots on the Shelf Bottom and Right Side. Then insert Back **g** into place between Center Divider **f** and Right Side **a**.

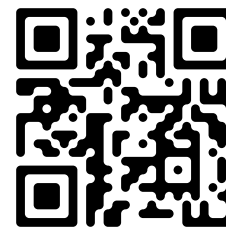

4 Place the other Back **g** above Center Divider **f**, then put the other Shelf Bottom **c** into position, tabs in slots.

5 Put the Shoe Shelf Left Side **b** into position, slots over tabs, ensuring that it is oriented correctly, matching the Right Side. Press downward on both Shelf Bottom **c**'s to lock joints into place.

X Disassembly

To disassemble, complete the assembly steps backward, taking apart instead of putting together. If pulled on firmly, joints will come apart without damage.
