TODDLER TOWER FULL PLATE

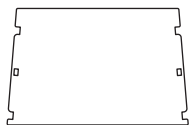

PARTS

A Outer Plate

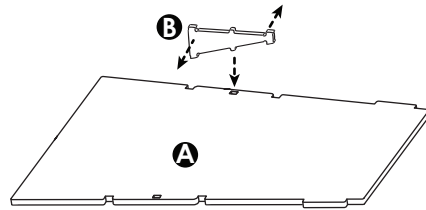

B Sides (2x)

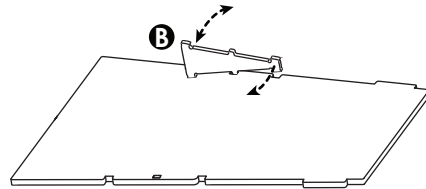

C Inner Plate

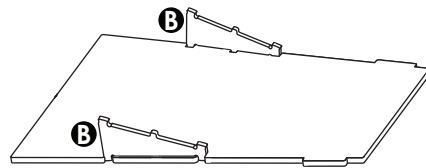

1 Turn Side **B** slightly to fully insert the middle tab of Side **B** into the hole in Outer Plate **A**.

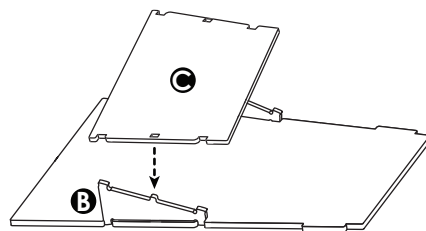

2 Lock Side **B** by pushing the thin end into its notch and flexing the wide end into its notch.

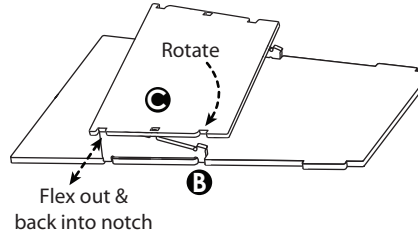

3 Repeat Steps 1 & 2 with the other Side **B**.

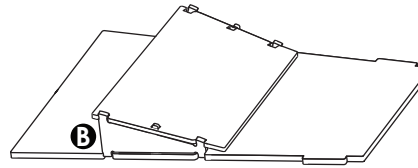

4 Turn Inner Plate **C** slightly to insert the tab on Side **B** through the Inner Plate **C** hole.

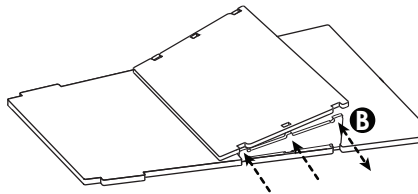

5 With the middle tab secured, turn Inner Plate **C** until the thin end tab on Side **B** goes into its notch on Inner Plate **C**. Flex the wide end tab of Side **B** out until it locks in the notch.

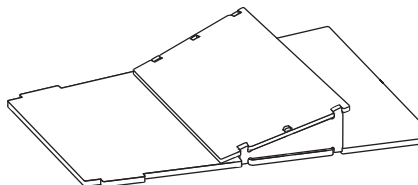

! One Side **B** should now be fully secured, as shown.

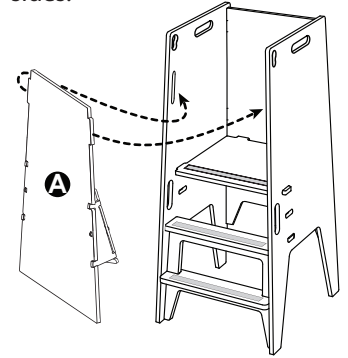

6 On the other side, tilt the remaining Side **B** outward. Push in the thin end tab and the center tab. Flex out and insert the wide end tab.

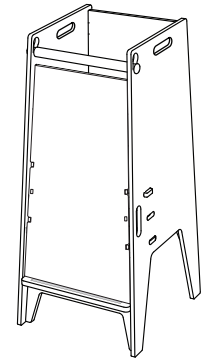

! The tabs should all be fully secured, as shown.

7 Without the dowel in place, insert the Outer Plate **A** tabs in the slots in the toddler tower sides.

8 Lock the dowel in place and you're set!
