

## Parts

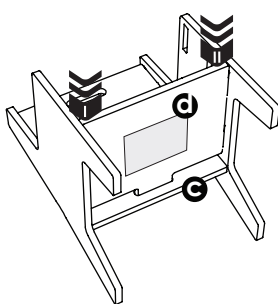

**!** Ensure the groove is always facing toward the shoulder during assembly.

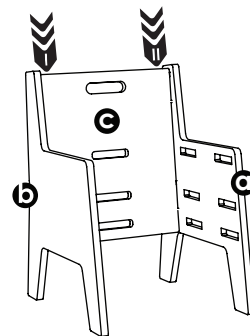

**3** Lay chair on its back. Gently bend **a** and **b** apart to fit seat **d** tabs into slots. Slots used determine seat height.

**1** Put tabs on **c** into slots on sides **a** & **b**.

**4** Firmly push down on seat **d** to lock into place. Large tab of **c** goes in slot on back **c**.

**2** Tighten joints on one side (I) then the other side (II) by pushing down top corner of **c**.

**X** To remove seat, use an object that will not scratch the wood as a lever to loosen tabs, as shown.

# sprout

Simple. Modern. American Made.
