

# *Nano Glass Nail Buffer*

Get a professional-looking manicure with a breathable, gloss finish right at home. Skip the salon and say goodbye to dull nails.

The **Nude Nail Buff** smoothens the surface and polishes the nail plate to give you the ultimate shine.

Safe to use with a side to side motion, unlike harsh emery boards that cause keratin layers to shed, leaving nails thin and peeling. Moreover, this tool seals the keratin layers together giving your nails a beautiful shine that'll outlast any cardboard emery board!

Made with high-density nano glass, this 2-in-1 manicure tool functions as both a nail file and surface polisher.

## *Key Features*

- Effective, slim and sleek
- Made with high-density nano glass technology
- File in any direction to seal nail tips without any damage and reducing infection
- Protect the nails from damage and splitting by sealing the keratin layers
- Reusable and eco-friendly

## *How to use me:*

- File: Shape and smooth nail edges with the textured side of the file
- Buff: Gently buff the nail surface with a side to side motion creating a beautiful shine
- Clean: Wash, dry and store in its protective case

*RRP: £8.99*
