

Tweezy Facial Hair Epilator

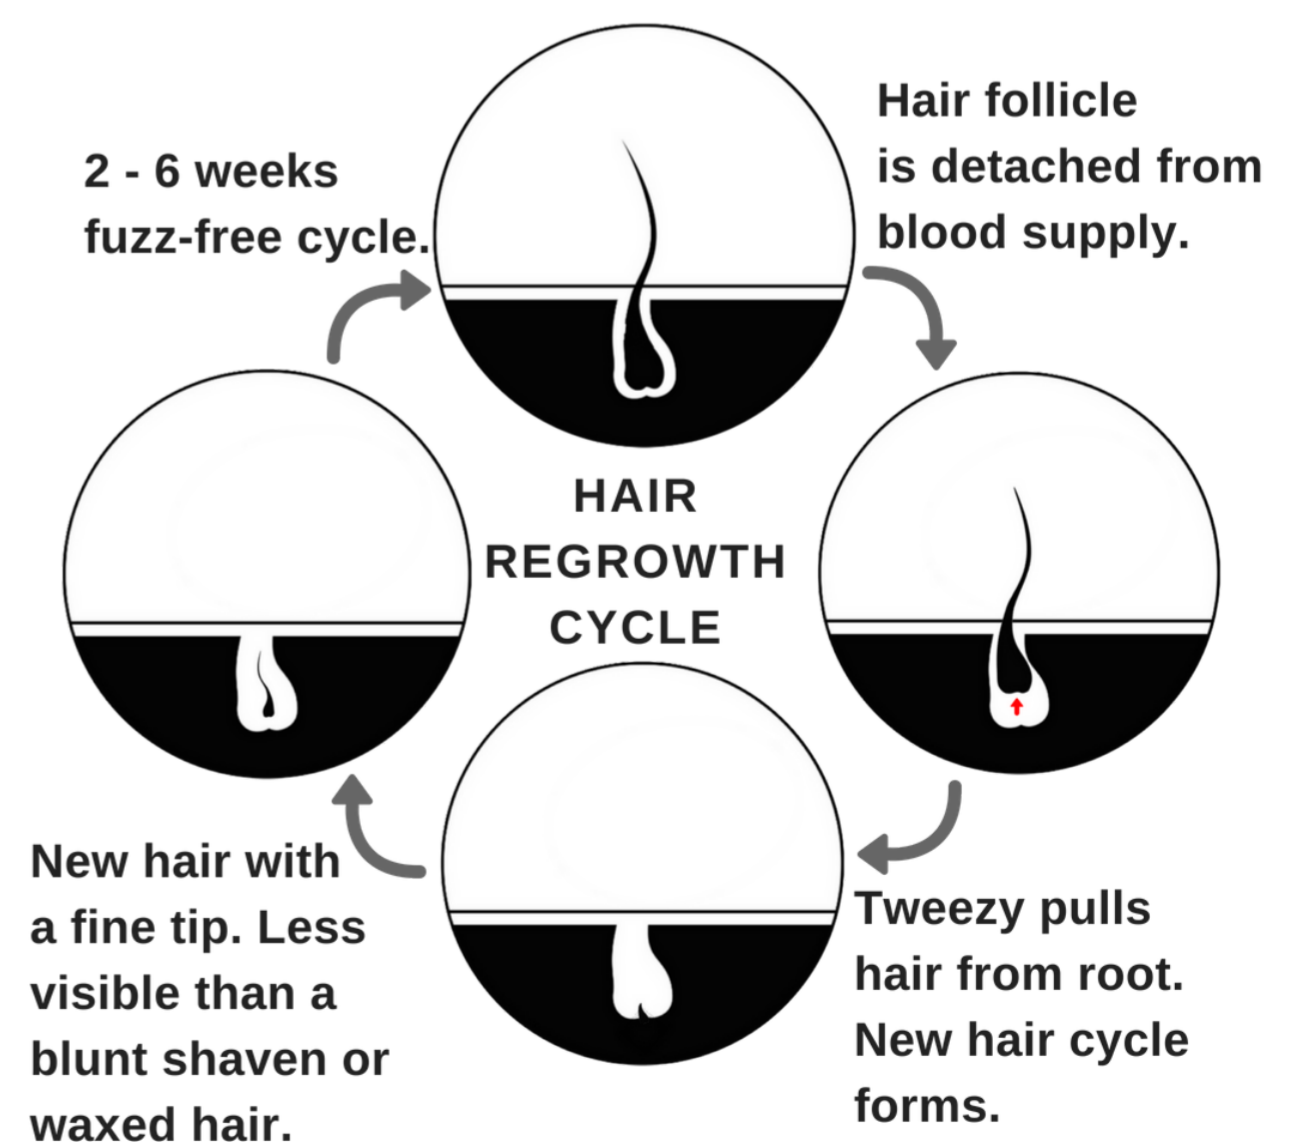

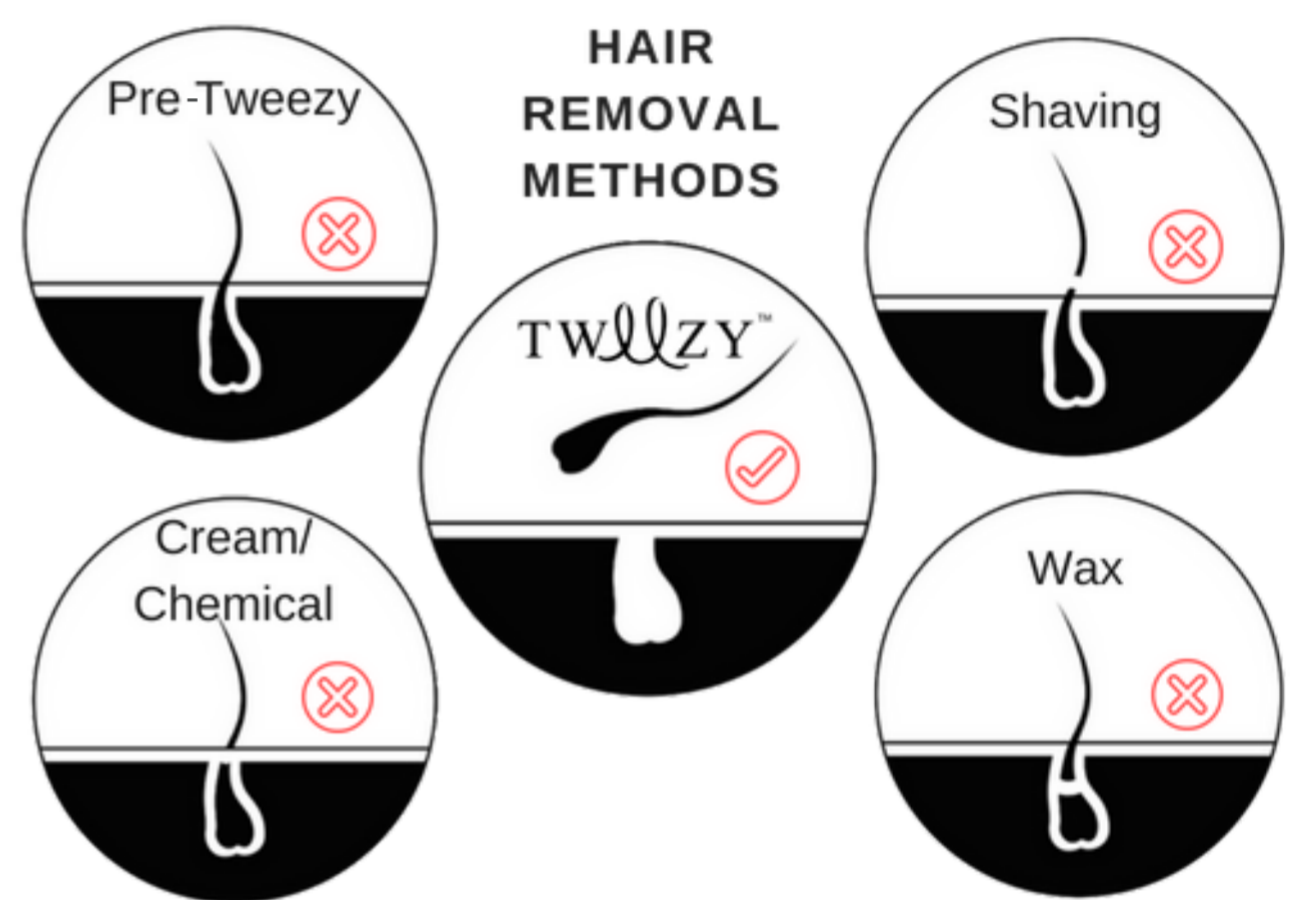

Take control of your facial fuzz - courtesy of the revolutionary facial tool that actually works: The Tweezy Epilator.

Tweezy Epilator removes unwanted hair on the face (except eyebrows) from the root in a quick and easy process in the privacy of your home.

Tweezy Epilator is the kindest way to rid your face of pesky hairs by gently removing strands from the root, like waxing but without the trauma.

Unlike waxing or depilatory creams, it doesn't aggravate the top layer of skin as it tugs.

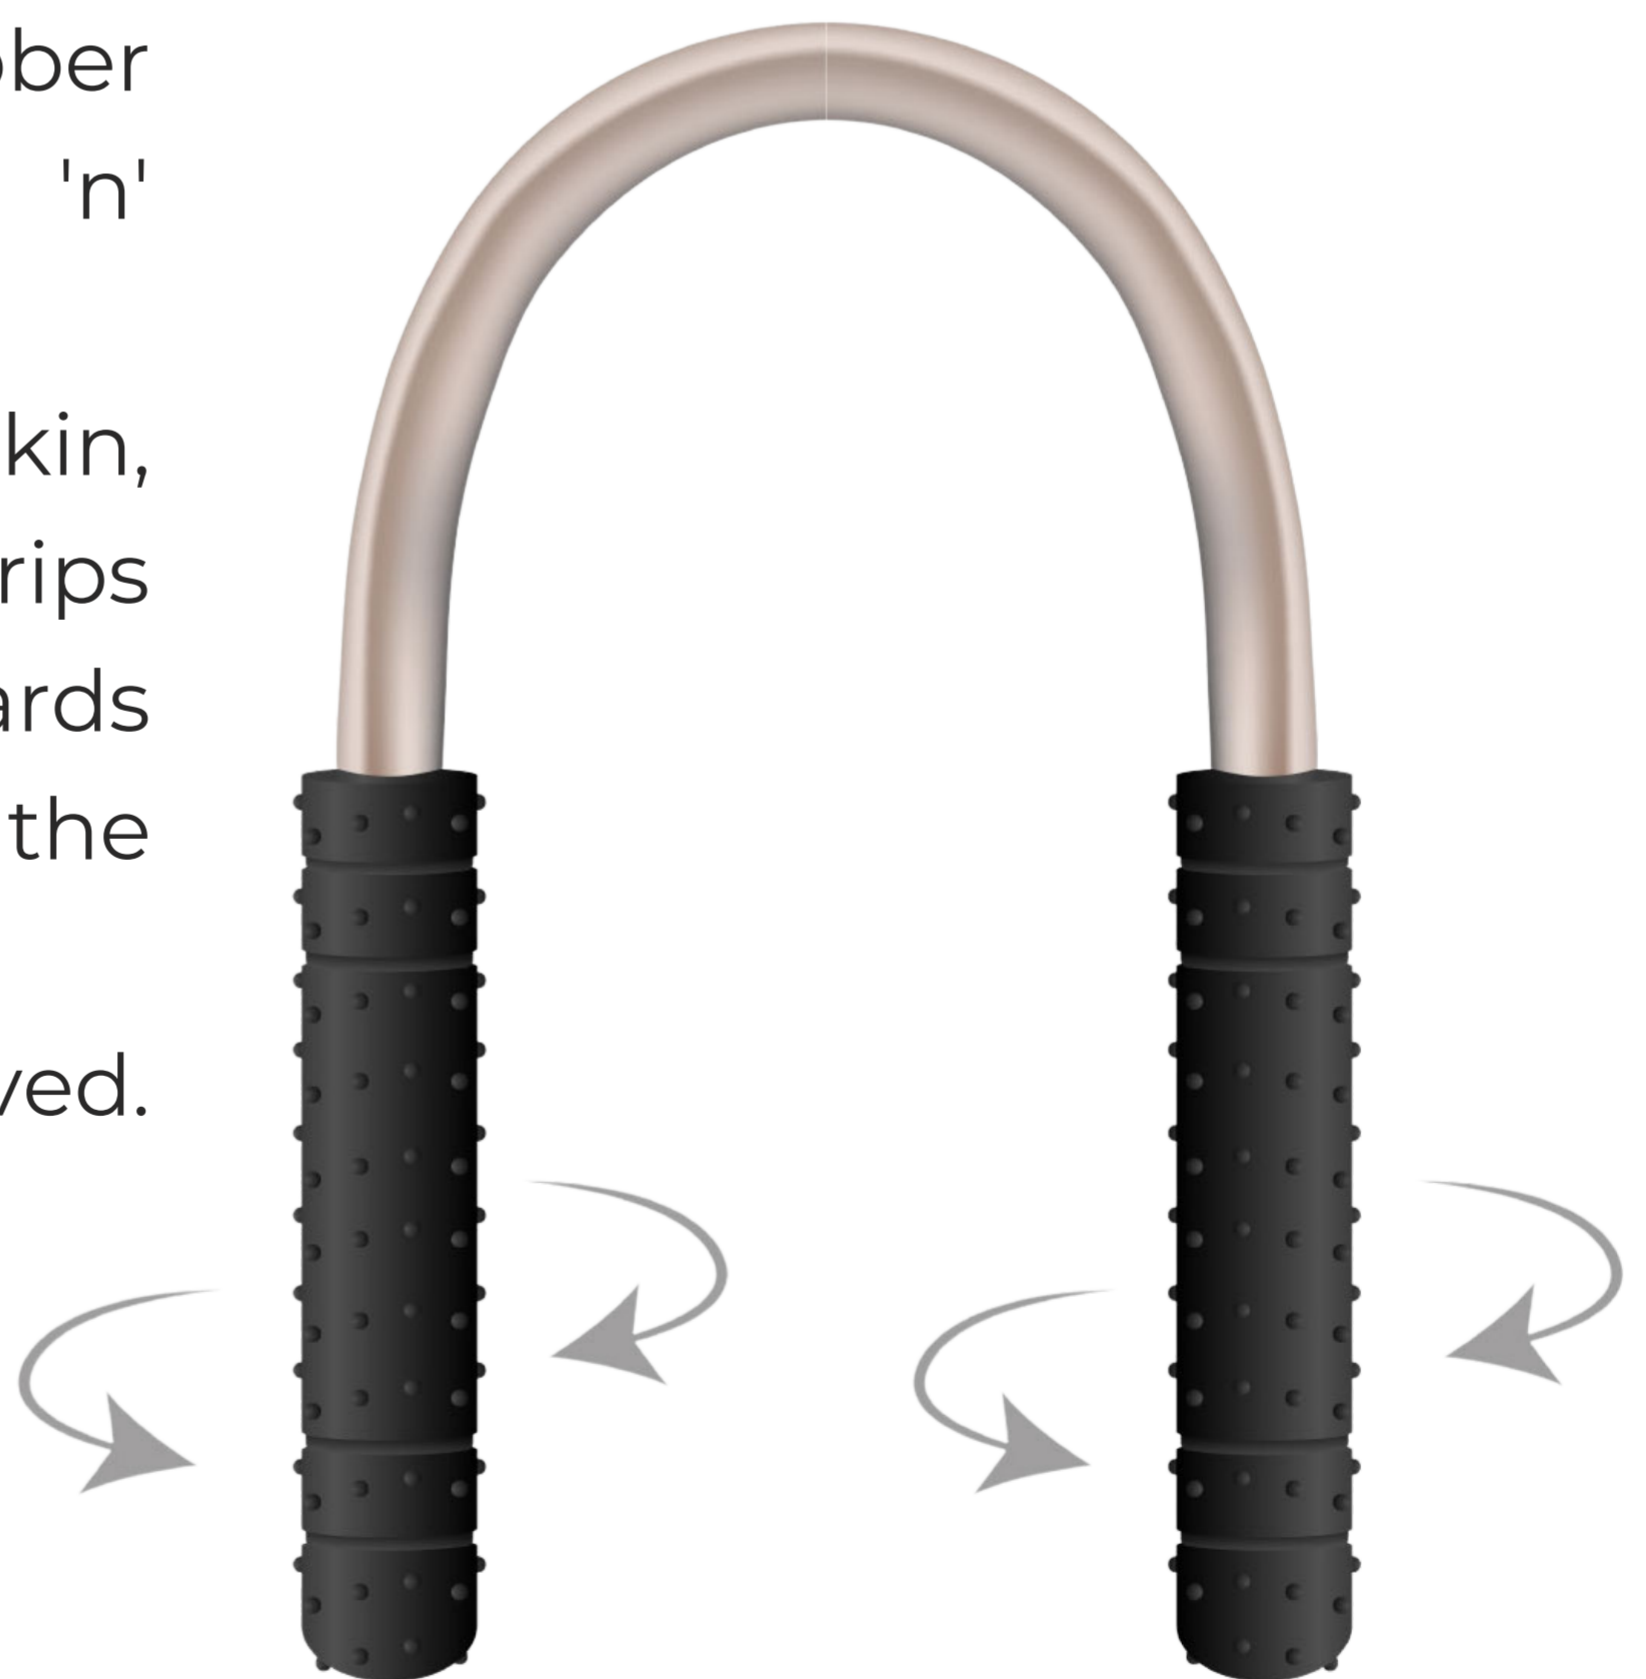

Why the Tweezy Epilator?

- Slow hair re-growth by removing them from the root
- Long-term hair removal solution as it weakens the follicles
- Cost-effective - just £10
- Anyone can use Tweezy; teens, older women looking to slow post menopausal hair growth, even men can use it outside the shaving zone
- Compact, convenient hair removal tool
- Leaves skin irritation-free - nobody would ever know you've used Tweezy!
- Safe and suitable for delicate facial areas and sensitive skins
- It's virtually pain free (avoid if it's that time of the month!)

How to use me:

- Hold each end of the rubber grips and bend into an 'n' shape.
- Place spring against your skin, twist and roll the grips between your fingers, inwards and upwards - against the direction of hair growth.
- Continue until hair is removed.

RRP: £10
