Black AVRack Bolts Pack of 100.

Rear Door

Specifications

The AV Classic is a stylish, high quality 19" cabinet, specifically designed to meet the specialist needs of the AV market.

The Classic is not just a lightweight data cabinet or so-called 'multiapplication cabinet'.

The Classic uses heavier gauge steel with extra bracing and modified, strengthened mounting profiles to take the weight of heavy multi-channel amplifiers.

Vented shelves rated to 50kg loading capacity are also available, along with heavy duty castors.

It's not just strong, it's good looking too, with black powder coated mounting profiles and bracing bars and specialised trim strips for a co-ordinated finish and 5mm tinted, toughened glass to BS6206A specially bonded to the door.

The AV Classic has been designed to give maximum rigging access with AV cable management mounts and easily removable side and rear panels.

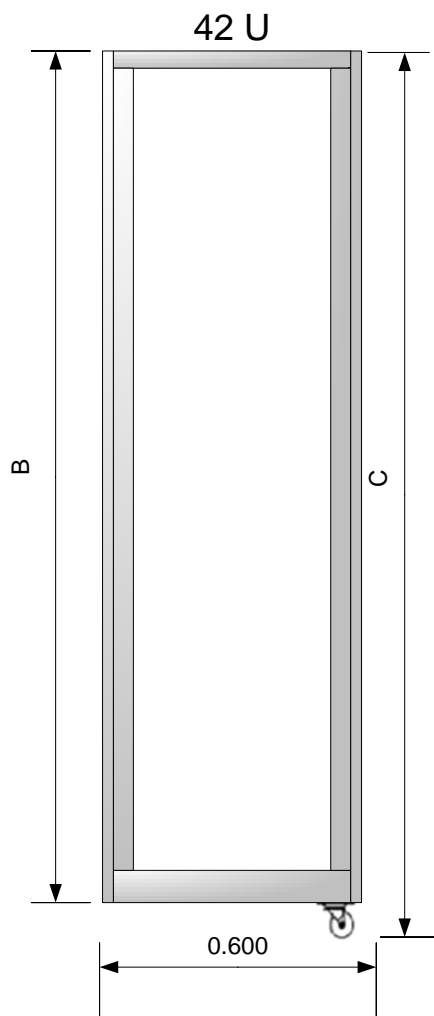

What's more, the Classic is delivered fully assembled, saving valuable installation time and money.

With a full range of accessories, including shelves, fan trays, cable management and custom fascia's the Classic offers quality at a great price.

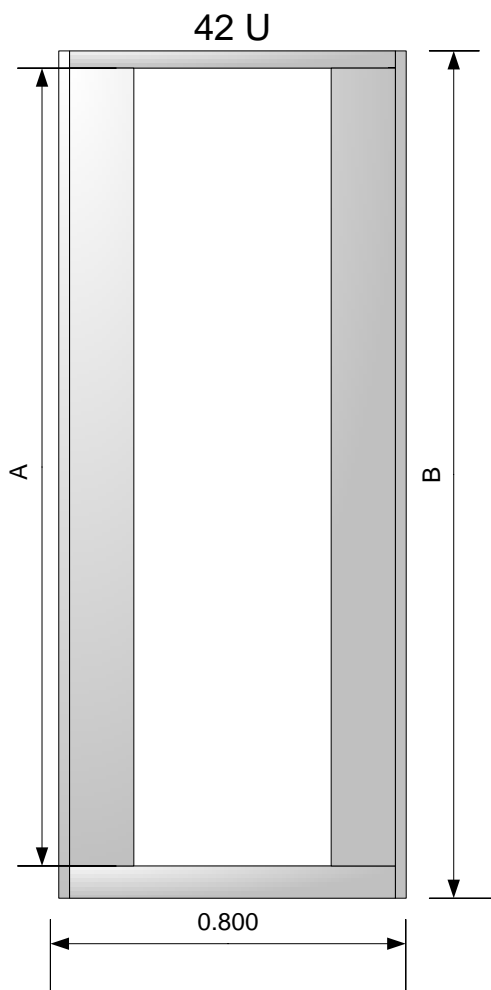

The AV Classic is available in several sizes; 800mm x 600 and 600x600mm, which both come in a choice of heights from 21U to 45U.

Supplied as standard in black, the AV Classic is also available in other colours on request.
