

Product Name: 1U Rack Mounted 4-Way TCU

**Features**

- Four temperature control units in a 1U rack panel for monitoring 4-components within a rack.
- Temperature probes on 1.5m cable for accurate component sensing.
- Controls 12Vdc fans up to 2W.
- Four intelligent temperature displays housed in a 1U rack mount panel, allows real-time monitoring of equipment or air-space within a rack environment.
- Four TCU's allow 4 independent items of equipment or rack areas to be monitored and 4 independent fan units to be controlled.
- Operational temperature and hysteresis (temperature difference above and below the set temperature at which point the fans are turned on and off) is user programmable through front panel pushbuttons.

**Dimensions**

Product	A Height	B Length
