

Product Name: 24 Port CAT6 Patch Panel

Features

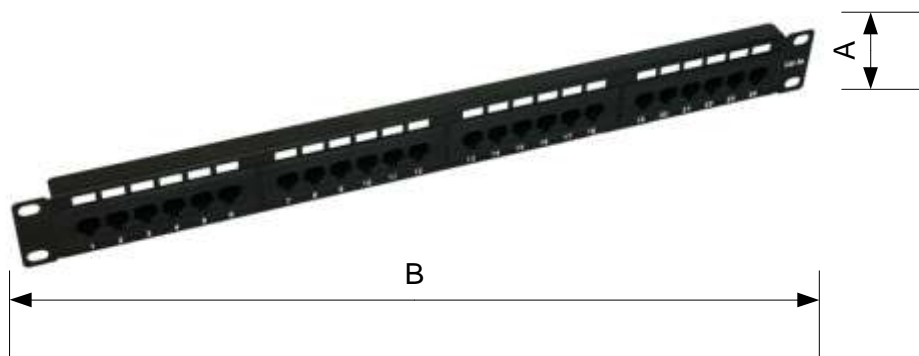

- Featuring quality components with full independent testing up to Gigabit Ethernet (1000BaseT) standards.
- Is also backward compatible with existing cabling infrastructure including running 10BaseT and 100BaseT networks.
- Featuring ease of use features for the network installer including KATT (Krone-AT&T) punch down IDC and 'at a glance' colour coding for both TIA-EIA-568A/B network configurations.

Specifications

- Quality pressed Steel construction with individual port labelling
- Gold over Nickel plated jack contacts.
- Phosphor Bronze & Nickel plated IDC terminals.
- IDC terminals accept 22 to 26AWG solid and stranded wires
- Rear mount IDC connection block, KRONE compatible.
