Total		28.41	32.50

Terpenes

Analyte	Mass	Mass

Total THC = THCa * 0.877 + d9-THC
Total CBD = CBDa * 0.877 + CBD
LOQ = Limit of Quantitation; The reported result is based on a sample weight with the applicable moisture content for that sample; Unless otherwise stated all quality control samples performed within specifications established by the Laboratory. Cannabinoid quantification by Gas chromatography-flame ionization detection and Capillary column technique with a limit of detection of 0.03%. Procedure reference Analytica Chimica Acta 468; U.S.P

* analysis includes all 96 target compounds on the Health Canada Mandatory List Oct 2018.

** Trace = presence & identity of compound verified, value below Limit of Quantification

As per international standards, all observed values are reported even if they are below LOQ's.

LOQ or MDLs are interpretative & given as guidance only & do not affect reported results.

Method: Sample is solvent extracted then cleaned using SPE (QuEChERS) methods. Multi-residue analysis is carried out by using UPLC-ESI-MS/MS/APCI & GC-MS: SPME. Detection of compounds meet or exceed HC requirements. Procedure ref AOAC 2007.01; USP <561><565>, EU 2.0813. Methods were fully validated.
