Kirsch Sinus Lift Instrument Set SMALL

for sinus floor elevation, modif. acc. to Dr. Kai Zwanzig

Responding to numerous customer requests, the proven Kirsch shapes were minimized during the further development of the new sinus lift instruments SMALL.

- The smaller instruments allow the preparation of a minimized window.
- Regarding the angles of working tips, the previous Kirsch Instrument Set left nothing to be desired.

- The minimized analogous instruments now enable the practitioner to perform the preparation in a smaller area without injuring the Schneider's membrane.
- The **ZEPF**-Line-handle allows a safe, tactile guidance of the instruments.

Optionally, two instruments 41.868.05SL and 41.868.06SL with a longer 1st shaft are offered.

41.868.05S

Kirsch, Sinus 5, SMALL, Elevator 90°/90°/60°, Titanium **ZEPF**-Line Handle, double-ended

41.868.06S

Kirsch, Sinus 6, SMALL, Elevator 90°/90°, Titanium **ZEPF**-Line Handle, double-ended
