### **Section 4. First Aid Measures**

**Eyes:** Flood with large amounts water at least 20 min.; get immediate medical attention if irritation persists. Can cause irritation, redness, tearing, and blurred vision.

**Skin:** Flush exposed area with water. Remove all contaminated clothing. Prolonged or repeated contact can cause moderate irritation.

**Inhalation:** If affected, remove individual to fresh air. If breathing is difficult, administer oxygen. If breathing has stopped, give artificial respiration. Keep person warm, calm, and get medical attention.

**Oral:** If swallowed, induce vomiting. Vomiting can be induced with syrup of Ipecac. Give fluids until the vomitus is clear. Get medical attention.

### **Section 5. Fire Fighting Measures**

**Flash Point:** 250°F

**Autoignition Temperature:** Not determined

**Flammability Limits in Air:** Not determined

**Extinguishing Media:** Carbon dioxide (CO<sub>2</sub>) water spray. Dry chemical foam can be used to cool fire-exposed containers.

**Fire Fighting Procedure:** Self-contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals. Evacuate area in case of overheating or fire. Vapors are heavier than air and may travel to a source of ignition and flash back. Static electricity will accumulate and may ignite vapors.

**Hazardous Decomposition Products:** Carbon oxides and various hydrocarbons.

### **Section 6. Accidental Release Measures**

**Containment/Clean Up:** Sections 13 and 15 of this MSDS provide information regarding certain Federal and local requirements. Collect for disposal. Clean up remaining materials from spill with suitable absorbent. For large spills provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. Clean area as appropriate as some silicone material, even in small quantities, may present a slip hazard. Final cleaning may require steam, solvents or detergents. Observe all personal protection equipment recommendations described in Sections 5 and 8 of this MSDS. Observe all Federal and government regulations that may apply to the cleanup of this material.

## **Section 7: Handling and Storage**

**Handling (Personnel):** Avoid contact with oxidizing agents. Spilled substance increases risk of slippage.

**Storage:** Keep container tightly closed.

## **Section 8: Exposure Controls and Personal Protection**

### **Engineering Controls:**

**Local Exhaust:** Provide sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure below TLV(s).

**General exhaust:** Recommended

### **Personal Protective Equipment for Routine Handling:**

**Eyes:** Use proper protection – safety glasses as a minimum.

**Skin:** Washing at meal time and end of shift is adequate.

**Suitable Gloves:** butyl rubber protection gloves

**Inhalation:** If spraying or other operations that generate an aerosol mist are conducted, respiratory protection for exposed personnel is recommended.

**Precautionary Measures:** Avoid eye contact.
