Metal Polish ™

Part	Size	Case Size
SEA-MP16	16 OZ	12
SEA-MP1	1 Gallon	4

BENEFITS
* Removes 2000 grit scratches
* Restores original finish
* Provides brilliant shine

DESCRIPTION
Sea-Shield® Metal Polish is a liquid rouge that quickly removes oxidation and restores a brilliant shine to dulled stainless steel, aluminum, brass, and chrome. For best result use in combination with Sea-Shield® Soft Felt Pad. This ammonia-free formula wipes on and off with little effort. For long lasting protection, apply Sea-Shield® Nano Coating.

DIRECTIONS
Apply Sea-Shield® Metal Polish to a felt polishing pad and polish stainless using even pressure then wipe off excess using a cotton rag. When working on an area near paint or gel coat, avoid getting black residue into it as staining can occur. More polishing and pressure will remove more of the fine scratches. May be applied by hand or by machine. See Stainless How To's for machine polishing www.sea-shield.com/faqs.

RECOMEND SURFACE
• Chrome
• Stainless
• Aluminum
