## The Artist

Creative minds and personality

Women love artists! Men love artists! In fact, everybody loves artists who are different from the regular guys. Whether you're a drummer or a vocalist in a band or someone who has the flamboyancy to put down live men with the help of portraits, artists are men who know how to sweep the other person's emotions for him. The artist's personality is both complex and in need of help and understanding. Most artists see the world much differently than other people. They look at a tree and see a giant feather duster, or they see a color and can taste it.

Soothing and pampering fashion underwear is exactly what they need when it comes to calming down themselves. Mostly disorganized- their lives, closets, and house are in a mess say a lot about their lifestyle. Something with abstract or Aztec prints will be the suitable description for them.
