

Ladies Leggings – Sizes Measurement

All measurements are in centimeters & are based on real women that have tried and tested our leggings.

Please note that each person is different by proportion and no one is an exact measure. However this guide will assist in providing the most relevant fit based on your waist, hips & bottom measurements.

Important – due to a supply change in the fabric manufacturing process, there has been a minor change in the elasticity of our leggings. We have since altered all our size cuts to allow for this manufacturing change. So please take note of this if you are repeat customer. We suggest sticking with your normal size. As it’s the same fabric just a firmer, more fabulous fit.
