CREWTENDER

INFLATED AIR FLOOR TENDER BOAT RANGE

The Crewsaver range of air floor boats have been designed and developed to offer an affordable, high quality tender which is ideal for all round use, whether you are simply getting to your boat or getting out on the water for some fun.

The inflatable air floor creates a solid platform giving you greater stability and on water performance. All models are lightweight, compact and come complete with carry bag, pump, two piece paddles and repair kit.

These tenders can be easily rolled up for transporting or keeping stowed in a locker. It can also be fixed to stern davits by using the integral davit eyes and davit rings additional stainless steel rings on the outside of the bow help in towing and lashing down of the boat. These boats are built to last using high quality materials and the wide rubbing strake offers all round protection during those moments when coming alongside.

A wide range of traditional or electric out-board engines can fitted to the solid transom to give you a stylish and practical inflatable tender.
