

TERRAINHOPPER

CREATED FOR ADVENTURE

THE ULTIMATE
IN OFF-ROAD MOBILITY

WHAT IS A TERRAINHOPPER?

TerrainHopper is an electrically powered four wheel drive off-road mobility vehicle with stunning design, innovative technology and breathtaking performance. These award winning vehicles are engineered to conquer deep mud, soft beach sand, snow, rocks, steep hills and many other obstacles. Our goal was to design a capable and stylish off-road vehicle that would allow adventure seekers the freedom to experience the outdoors with ease and comfort.

One of the special features is our unique patented suspension system which provides for a comfortable ride over the most uneven surfaces. With a ground clearance of almost ten inches and incline climbing capability of 35 degrees, some people have called it a “mini Land Rover.”

With an abundance of customization options, each TerrainHopper is personalized for the user, engineered for everyone and Created for Adventure.

To learn more about how TerrainHopper can help you reclaim your freedom, visit terrainhopperusa.com or email info@terrainhopperusa.com. The TerrainHopper is classified as an Other Power-Driven Mobility Device by the U.S. Justice Department and can be taken anywhere members of the public are allowed to go. Reclaim your freedom!

- TerrainHopper Team

FREEDOM RECLAIMED

FREEDOM RECLAIMED

With an award winning design, TerrainHopper allows one to cruise the beach, explore the forest, hike with friends, enjoy the parks and take in the view.

“I use my TerrainHopper once or twice a day. I have been everywhere - through mud, water above my ankles, soft sand, steep hills, and rocks, including National Parks here in the US. Places I gave up going years ago. There is no other mobility vehicle like it in the world. The joy of my found freedom with my TerrainHopper is Priceless.”

- Frank, May 2017

TERRAINHOPPER
CREATED FOR ADVENTURE

OVERLANDER 4ZS

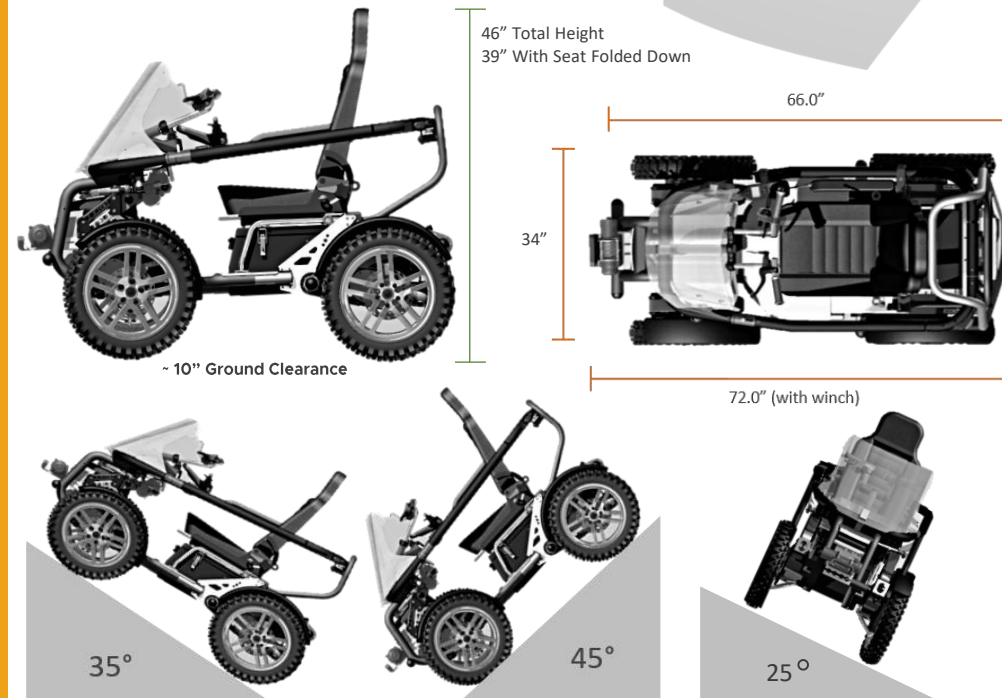

The Overlander 4ZS is the outstanding go-anywhere off-road mobility vehicle. A dream come true for those who wish to visit places previously inaccessible. Thanks to the unique patented independent suspension system, your riding experience is smooth, even over rough terrain.

*range varies depending on terrain and user weight

To say that Isla loves her TerrainHopper is an understatement! It has given her (and our family) a new lease on life. The joy she experiences with her newfound freedom and independence on our property makes my heart swell. She can drive herself up the hill to grandma's house, and play alongside her brother safely and independently. We can now envision family outings to the beach, camping and hiking in a whole new light. The terrain hopper will grow with her, and will positively impact her future."

-Jill

"It is life changing for us. There is no stopping us now!"

-Todd and Teresa
