PURIFY THE AIR

CASPR was the first company to complete testing to the new ASHRAE Standard 241-2023 for Control of Infectious Aerosols. Testing conducted by independent lab ARE Laboratories showed the CASPR system reduced over 99% of aerosolized MS2 virus within 30 minutes and over 70% within just 4 minutes.

Advantages:

- Creating safer indoor environments.
- Minimizing energy usage and costs.
- Continuous disinfection without being disruptive to facility operations.

CASPR Medik 14" MS2 Log
Reduction (Time Trial in Minutes)

Time Min.	4	8	12	30
Net %	70%+	85%+	90%+	99%+
