VersaClamps GUARDRAIL SYSTEM

Clamp on Stanchions

Dakota Safety is a supplier of BlueWater Manufacturing, a leading manufacturer of passive construction fall protection systems and portable guardrail systems, clamp on stanchions for temporary, portable guardrails.

Description

VersaClamp – clamp on stanchions for both parapets and slabs for passive fall protection

VersaClamp is a clamp on stanchions portable guardrail system for parapets and concrete slabs and is the most versatile clamp on the market. It can be easily moved from jobsite to jobsite, and can be used both on parapets and slabs offering passive fall protection that meets OSHA regulations. The VersaClamp's unique compression locking system makes it easy and fast to install; the compression locking system can also be changed 90 degrees to clamp on to slab edges in addition to parapets. One clamp for 2 applications.

A basic version of the VersaClamp to be used specifically on parapets to provide a more cost effective passive construction fall protection system.

VersaClamp stanchions are to be installed in 8ft increments

Features

VersaClamp

- Adjustable so that can be used over parapets or rotated 90degrees to accomodate slab edges.
- VersaClamp expands from 2 inches to 16 inches; a larger version is available that expands to 24 inches.
- Compression plates are offset to protect copings and flashings.
- Adjustable guardrail post complies with OSHA guardrail heights from the work surface.
- Toe-board brackets available for deck applications.
- Adaptors for rail sections available for deck applications.
