

Digital printing is a specialty market requiring a new way of thinking. Rapid production of low volume, high quality graphics is necessary to produce high profits. The DragonAir line of curing systems is designed for digital, water-based, plastisol, polyester, and specialty printing for fast paced, high production shops. The DragonAir Core Technology™ ensures consistent and complete curing on all garments.

DragonAir Crimson

These units feature DragonAir Core Technology. The Crimson is designed for low volume direct-to-garment, discharge, and water based printing.

- DragonAir Core Technology
- Digital temperature control
- Variable air volume
- 4" heat bump for faster cure
- expandable heat sections

DAC-2406
DragonAir Crimson

DragonAir Core Technology

DragonAir Core Features:

- Air heat
- Filtered Air flow
- Cool external wall temperature
- Variable speed recirculation air flow
- Water vapor evacuation from chamber
- Independently controlled IR bump

DragonAir Standard Features:

- DragonAir Core Technology
- Heavy-duty construction
- Heavy duty drive train system
- Insulated triple wall design
- Fully assembled
- Crowned rollers for perfect belt tracking
- Teflon coated fiberglass belt

Crimson Model	DAC-2406	DAC-2409
Unit Width	24"	24"
Unit length	72"	108"
Feed length	22.5"	22.5"
Exit length	22.5"	22.5"
Bump length	4"	4"
Chamber length	30"	60"
Voltage requirements	208vac 1Ø	208vac 1Ø
Full load amps	30	60

DragonAir Griffin Series

These units feature TRX software and DragonAir Core Technology. The Griffin is designed for high volume discharge, direct-to-garment and water based printing.

- DragonAir Core Technology
- TRX software
- Touch screen controls
- DragonAir standard features
- Expandable
- Modular construction
- Easy accessibility for maintenance

Griffin Models	DAG-4860	DAG-4890
Belt Width	48"	48"
Belt length	144"	184"
Infeed length	30"	30"
Exit length	30"	30"
Cooling and exhaust chamber length	30"	30"
Chassis length of base machine	150"	180"
Voltage requirements	208vac 3Ø	208vac 3Ø
Full load amps	66	99

Main Running Screen

- Touch screen controls for all variables.
- Stores operating parameters for 36 jobs.
- Password protection.
- Set °F or °C.

Performance Screen

- Real time shirt temperature information.
- Compare costs between runs.
- Cost analysis of each job.

Eco Mode

- Program for end of day shut down.
- Program for break time.
- Reduces energy costs.

DragonAir Core Technology

DragonAir Standard Features:

- TRX software
- Touch screen controls
- DragonAir Core Technology
- Heavy-duty construction
- Heavy duty drive train system
- Insulated triple wall design
- Crowned rollers for perfect belt tracking
- Teflon coated fiberglass belt

DragonAir Core Features:

- Air heat for more precise temperature control
- Filtered Air flow
- Cool external wall temperature
- Variable speed recirculation air flow
- Variable speed vapor exhaust
- Water vapor evacuation from chamber
- Easy access air filters
- Independently controlled IR bump

TRX Software Standard Features:

- Stores up to 36 different jobs profiles
- Stores up to 18 shop maintenance tasks
- Programmable auto-shut down and Eco mode
- Multi-lingual functionality
- Individual job analysis of time
- Individual job analysis of temperature
- Individual job analysis of power use
- Onboard diagnostics system
- Password protection

DragonAir Fire Series

These units feature TRX software and DragonAir Core Technology. The Fire is designed for medium volume discharge, direct-to-garment and water based printing.

- DragonAir Core Technology
- TRX software
- Touch screen controls
- DragonAir standard features
- Adjustable height heater rack
- Independent baffle height adjustment

Fire Models	DAF-3611
Belt Width	36"
Belt length	132"
Infeed length	30"
Exit length	30"
Bump length	8"
Chamber length	73"
Voltage requirements	208vac 3Ø
Full load amps	50"

Settings adjustment

- Set language choice.
- Set alarm settings.
- Preset AutoShutdown mode.

Shop Maintenance

- Store up to 18 maintenance tasks.
- Visual alarms for notification.
- Touchscreen file maintenance.

Printing Parameters

- Adjust air flow.
- Adjust belt speed and direction.
- Rack height confirmation.
- Save for future runs.
