

AIR Blazer

X Series

AirBlazer X-Series™

Rock solid. Blazer dryers are designed to thoroughly cure plastisol and nylon ink systems. These economical units feature dependable Calrod heating panels in an efficient heat controlled oven chamber. Simple to operate and reliable curing make these a great value.

Operated with fan cooled digital temperature controls, the AirBlazer provides consistent results for a variety of applications. The digital belt speed allows for chamber times as short at 15 seconds and as long as 59.99 minutes. Powered intake air and powered exhaust are standard features as well as the X-series exhaust chamber.
