

Digital Factory 11 New Features

Industry 4 Compliancy

- Updated logging functionality to Industry 4 Standard

Printer Specific Documentation

- PDF Files can be added to printer drivers for device-specific documentation

Print Label Improvements

- Print labels now support QR codes, job/copy options and margins

Device Spot and Processing Option Improvements

- Device spots will now more accurately recreate colors when Processing Options are enabled

Export Clipping Paths Improvements

- Functionality to export clipping paths in either roll or sheet mode

PDF Cutter Driver Improvements

- The PDF cut driver now supports layers

Automatic Job Sorter Improvements

- AJS has been updated with new functionality for Cadlink Actions and Ecommerce Integration

Underbase with Highlight

- In Processing Options user can now apply an underbase and a highlight to the white-only areas in one pass

Job Color Removal

- When using the Job Color Replacement tool users can now also simply remove a color

Full Designer in the Queue (still in dev)

- A full version Helper.exe (Signlab) can now be launched from Digital Factory allowing a user access to the full suite of Signlab design tools

Security Improvements

- Significant backend security improvements
