*Ink efficiency based on independent 3rd party testing between HP Latex 570 and SureColor S60600L. Test prints produced at equal print pass modes, color profiles, and adhesive vinyl media. Ink usage determined using HP and Epson proprietary ink usage calculation tools and weighing of ink units before and after printing.

ALL THE POWER OF S-SERIES WITH DOUBLE THE INK CAPACITY

- Longer unattended printing
- Best-in-class 98.2% Pantone certification
- Lower ink cost per square foot
- Same day lamination

ENVIRONMENTAL FACTORS

- **Reduce waste** up to **90%** with innovative **ink pack** system vs Epson cartridge based SureColor S-Series*
- GREENGUARD Gold Full Room Wall Covering Certification.

SURECOLOR S-SERIES HIGH PRODUCTION SIGN PRINTERS

www.epson.com/s-series

*Same day lamination results based on Avery internal lamination testing at 6 hours after printing. Your results may vary based on environmental conditions, media type used, ink density, and other factors. *Print speeds are based on the print engine speed only. Total throughput time for any print depends on workstation configuration, file size, print resolution, ink coverage, networking, etc. Actual print speeds will vary. * Service coverage based on continuous participation in the SureColor S-Series Rewards Program. *Based on the weight of an empty ink pack vs weight of enough empty cartridges to achieve the equivalent volume of ink.
