

Manual Heat Transfer Machine

The HIX® HT series manual clamshell heat presses have been a mainstay of the graphics industry for 60 years because they're rugged, durable, and built to perform. Underneath the new paint and graphics, they now feature a full color LCD touchscreen controller with a wide array of features and a new high-performance molded rubber pad that is highly resistant to pressure.

At the heart of these presses is in-house using an exclusive transfer. The floating lower platen edge to edge at all temperatures. The easy to open and close handle full range pressure adjustment, and to straight handle designs.

the heat casting that is manufactured aluminum alloy to maximize the heat helps to provide even pressure from and even works on thicker substrates. is equipped with a spring assist, a adds 20% more pressure compared

HT Series

Overview

- These presses are a manual machine which features a features a digital timer that is adjustable up to 99 minutes and 59 seconds, shows countdown on readout, beeps after elapsed time, and resets when the open and close handle is raised. With full range pressure adjustment to work with every project.
- The HT Series now comes with a free Splitter Stand, allowing for the operators to "dress" the shirt easily over the lower platen, keeping the back of the shirt positioned underneath the machine and away from the heat and compression. This is handy when trying to avoid double-compression and heating of a previously applied transfer on the same shirt.
- Top Pressure Plate – The handle attaches to a 4"x5" pressure plate on the top platen instead of a single screw going into the top platen. This provides more even pressure on the outside edges of the press. Think of it as pushing down with your entire hand versus just your thumb.
- The HIX® HT Series Clamshell Presses are rugged, durable, and made to perform. A must-have for any serious start-up business, the HIX® HT-400 has earned respect for its numerous capabilities and reliability.

FEATURES

- All Metal Construction
- Integrated full color LCD touchscreen controller
- Up to four programmable presets
- Cantilevered Splitter Stand Included
- Large opening for easy shirt loading
- Lifetime warranty on heating element

HT-400 Features

- 15" x 15" Heat Platen
- 120v or 220v

HT-600 Features

- 16" x 20" Heat Platen
- 120v or 220v

TEMPERATURE RANGE

Off - 450°F (232°C) upper platen

CERTIFICATIONS

- CE Certified
- ETL Certified to UL & CSA Standards

ACCESSORIES (Not Included)

- PTFE Sheet
- PTFE Pad Protector
- Specialty Platen
