

Prime PU

MADE IN KOREA

PU heat transfer film is a soft and eco-friendly polyurethane which is highly suited for the transfer of designs onto garments. This easy to cut and weed film has high elasticity and strong adhesiveness, allowing fabrics to stretch through natural movement whilst maintaining excellent durability and the ability to withstand frequent washing.

PU heat transfer film is the ideal solution for high quality, detailed designs and numbering for t-shirts, sportswear and other garments where durability is essential.
