

AIR FUSION™

STÄHLE
Hobronix

Stahls' Hotronix® Air Fusion™ Family

Smarter technology from Hotronix®.

Air Fusion innovation is making garment decorating easier than ever. Your production times will be reduced; your profits will increase. When you combine Threadability™, Auto Adjust Pressure™ and Quick Change platens there's simply no other heat press that can compete.

Do the same job in about half the time.

Threadability™ - Just load your garment and decorate the front, back or side without removing it from the platen.

Thread It. Print It. Spin It.

Threadability™ of the lower platen significantly increases your decorating capacity.

Not your average heat presses.

- **Maximize Productivity with Auto Adjust Pressure™**
 - Four settings can be programmed to automatically adjust the pressure to the thickness of the item you're printing
 - High pressure heat printing capabilities with settings up to 120 PSI
 - Ideal for embossing and Direct-to-Garment applications
- **Touch Screen Control Panel**
 - Digital time, temperature, and pressure readout
 - Multiple time and pressure settings for pre-heating, two-color or mixed-media applications
 - Program and store hundreds of application settings
 - Auto On / Auto Off setting, so you're ready to print when the shift starts
 - Energy saving sleep mode
 - Cycle counter to track productivity
- **No Handle Required**
 - Greater control at the touch of a button
 - Air Fusion features user-safe, two-hand push-button control for operating upper platen
- **Durable Framework - Built Strong to Last Long.**
 - Engineering that stands up to the demands of your shop
 - The die-pressure cast-aluminum framework is scratch resistant, corrosion-free and extremely tough
- **Standard 16" x 20" Heat Platen with Non-Stick Coating**
 - The 3/4" thick platen has a cast-in tubular heating element ensuring even heat throughout the platen, eliminating cold spots
 - Maintains accurate heat during every application, for perfect results, press after press
 - Optional Quick Change lower platens
- **Made in the USA**

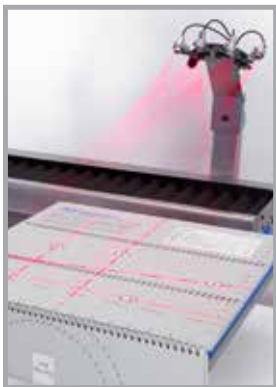

Quick Change Platens

Heat print any shape or size item effortlessly. It's easy when you have Quick Change platens. Flip the quick release lever and lift the platen out. No tools needed. Custom job? We'll make a custom platen for you.

Hotronix® Dual Air Fusion™

Double-Down on Performance

The Hotronix® Dual Air Fusion™ doubles down on performance, giving you 50 percent more productivity than a standard swinger-style heat press. With groundbreaking A and B workstations that operate independently or in unison, you get the additional performance of an extra heat press while maximizing time and space. With the inclusion of a second platen, the Dual Air Fusion doubles down on proven Hotronix® technology and takes performance—and profits—to the next level.

The Dual Air Fusion includes a laser alignment system that puts your jobs on target, each and every time. Four independently-adjustable lasers per platen enable precision alignment of graphics for full-front, left chest and numerous other applications. The system seamlessly integrates into the Dual Air Fusion's workstations and is controlled entirely through the touchscreen—power on or off and choose between dual or independent operation.

Quickly and easily position graphics for any heat printing job with the Laser Alignment Wizard™. Align each individual bulb of the Laser Alignment System to one of five popular layouts or use the rulers for custom placement. Follow the L.A.W. with this heavy-duty, spiral bound template to achieve consistent placement of heat printing designs and transfers every time.

- *Dual 16" x 20" Quick Change platens*
- *A and B workstations – operate independently or in unison*
- *Touchscreen control panel with programmable settings*
- *Industry-leading warranty*

2 – 16" x 20" Platens
220 Volt – 2250 Watts 10 Amps
Actual Weight – 260 lbs.
Actual Dimensions – 38"L x 38"W x 26"H
Shipping Weight – 500 lbs.
Shipping Dimensions – 46"L x 46"W x 34"H

Requires air compressor (not included) with minimum 1 horse power and 5 gallon hold tank.

Hotronix® Air Fusion™

Smarter, Air-Powered Technology. Faster Production.

A proven bestseller, this Auto Open/Auto Swing design reduces operator fatigue by eliminating arm and wrist motion with two-handed push button and foot pedal operation. The pedestal stand enables the user to adjust the height of the heat press from 37-44 inches for enhanced comfort. The heavy-duty casters provide portability and stability.

16" x 20" Platen

120 volt – 1800 Watts 15 Amps

220 volt – 2250 Watts 10 Amps

Actual Weight – 152 lbs.

Actual Dimensions – 40" x 32" x 57"

Shipping Weight – 245 lbs.

Shipping Dimensions – 48" x 40" x 58"

Requires air compressor (not included) with minimum 1/2 horse power and 2 gallon hold tank. Uses 2.3 CFM.
