

TexPrint[®]MP

MULTI-PURPOSE
Digital dye-sublimation print paper

FEATURES:

Widths to 320 cm and diameters to 1 meter.

High color output

Quick-Dry coating

Less residual ink

Energy efficiency

Waste reduction

TexPrint[®]MP is an easy-to-use multi-purpose sublimation paper. Engineered for the highest-speed, multi-head printers, MP's balance of quick-dry coating, excellent dimensional stability and superb definition provides the stable platform needed for your printing.

CUSTOMER BENEFITS:

Choose the ideal put-up for your print environment. Enjoy less waste, fewer roll changes and more up-time.

MP's unique blend of coating properties gives you more color, from less ink, than any competing "clay-coated" sublimation print-sheet.

MP's clay coating component provides smudge-free printing, even on the highest-speed printers!

Post printing, MP leaves the least residual ink in the print-page, ensuring the most color applied to your sports and athletic wear.

TexPrint[®]MP allows heat to migrate through the print-sheet quicker, reducing calendar dwell times and providing higher transfer speed, while depositing the richest and deepest colors.

Available in individually boxed or bulk packaging. Volume users can save time and labor by ordering bulk packaging.

Properties

Grade	GSM	Applications
TexPrint [®] MP/95	95 gsm basis weight	Soft & Hard Surfaces, Photography, Home Décor, Tradeshow Exhibits

TexPrint®MP Properties	
TexPrint®MP/95	
Basis Weight	95 gsm
