Please Read Before Use

Prior to setting the time and wearing the Halograph Tourbillon, the watch must be manual wound with the crown is in the first position, to power up the mainspring.

[Approximately 30 clockwise turns of the crown until you feel the slightest resistance. Overwinding the crown on a tourbillon will damage the mainspring and could require a full servicing and/or replacement fee.]

Time Setting

Gently pull the crown to the time setting mode (second position) to adjust the hands. Once you've set the time, push the crown back to the handwinding mode (first position). All done!

3301 Caliber Mov't Info

- Number of Jewels: 18
- Vibration Frequency of 28,800 BPH
- Power Reserve: Up to 40 hours
- Posture Difference: Under 50 seconds
- Accuracy: +/-25 seconds per day
- Crown Winding Direction: Clockwise, approximately 30 turns per day

Warranty

Xeric gladly offers a limited warranty covering defects in materials and manufacturing for a period of one (1) year after the original purchase date from an authorized Xeric retailer. This warranty does not cover batteries, case, crystal, crown, pushers, straps, or any changes that occur during use and not from manufacturing or assembly. This warranty is considered void if you open your caseback, push the buttons underwater, or expose your watch to moisture beyond the recommendation of the watch's water resistance rating. Proof of purchase is required for all warranty claims, so please save a copy of your receipt. Xeric reserves the right to not accept a warranty claim if a watch has evidence of excessive wear or misuse. Xeric reserves the right to repair or replace any watch returned for service at our option.

Additional Info

For warranty questions or service requests, please email us at contact@xeric.com.

Designed in California. Assembled in China
