

ALM Rectangular without radius

Product information

- Triple-layer material (aluminium-plastic-aluminium)
- Black plastic inner layer
- Outer layer in silver or gold
- Available with self-adhesive foil / adhesive foil
- Thickness: 1.5 mm
- marking technique: Engraving

ALUMATT products are high pressure decorative laminated sheets, preferably in plain colours. In contrast to standard laminates, Alumatt has a three-layer symmetrical structure of melamine resin impregnated cellulose sheeting. The colour of all layers is exactly defined. The colours of both outer layers are usually in stark contrast to the core colour. This colour contrast makes the engraving very readable. For engraving, the outer layers are kept very thin. The layer thickness is approximately 0.08 mm. The plain papers are homogeneously coloured in the mass. The colour connection is secured with these paper qualities. The base is free of heavy metals and has a high level of light stability.

Material properties

Alumatt (ALM) |

Adhesive properties

467 SK adhesive film with adhesive

Thermal properties

Temperature / temperature range -40 °C – 80 °C

Fire properties

Fire classification B2

ALM Rectangular without radius

General technical data

Single-line and multi-line labelling

Assembly method

Adhesive system

Labelling technology
