

The instructions for the Ranger Power on/off are not as difficult as it may seem. To turn the Ranger Electric bike **ON** simply press the battery button on the right side of the frame for 0.05 secs (half a second) then turn on the display/controller power button immediately. If you looked at the battery out of its frame You can visibly see the power light illuminated when the battery indicator is pressed. If you do not turn on the display after engaging the power button the

battery will automatically switch back to off mode.

RANGE 45-55 miles

CHARGE 4-7 Hour Charge Time

There is a default Power off to the Kasen Ranger display after 10 minutes of non-use. The Ranger Battery will turn off after 90 minutes of non-use.

When the bike has been turned on and you are wanting to disable it, you will need to hold the power button on the right side of the frame for less than 10 seconds and this will disable the power to the unit and you will visibly see the power to the actual battery (if looked at) off.
