## FEATURES

- AS 1428.1:2009 compliant design with a yellow contrasting insert colour\*
- Self-adhesive insert allows fixings to be fully concealed below the insert and is simple to install
- Concealed fixings improve aesthetics, are highly vandal resistant and prevent screws from becoming loose over time
- Architectural design featuring a solid insert colour set against an anodised aluminium profile
- Non-slip by way of near diamond hard mineral insert wear layer - P5 rated
- Graduated/chamfered back edge brings profile down to substrate level and removes trip hazard potential
- Suitable for internal & external applications
- Cut to length & with countersunk holes pre-drilled
- Suitable fixings & adhesives available for all applications
- Manufactured in Australia by Safety Stride Pty. Ltd. under a strict internal quality program which guarantees dependable output quality

\* This product is compliant to AS 1428.1:2009 so long as a minimum of 30% luminance contrast exists between it and the specified substrate. Please contact Safety Stride Pty Ltd for assistance regarding luminance contrast.
