A Leader in Visibility to the Blade.

- The narrow design of the front nose hood makes it easier to see your work. The cooling system for the radiator/oil cooler module is hydraulically driven and located at the rear of the machine.
- An in-line precleaner is placed under the hood to provide the operator with a more unobstructed view of the blade.
- Front cab pillars are minimized to reduce obstructions, and all-glass doors result in more glass area —for maximum visibility.

TR75 TRENCH ROLLER

Bobcat trench rollers are remotely controlled so you can take on tough compaction tasks from a comfortable distance away. These vibratory compactors are ideal for a variety of challenging applications including pipeline construction, structural backfill work as well as commercial, industrial and residential development.

FTX150-2

DURABILITY & SERVICEABILITY

Large engine bay doors provide easy access to the entire engine compartment Hydraulic pumps located at the rear of the machine for easy access

All filters and service points can be reached from the ground, making servicing the FTX150-2 simple and easy to do in the field

LOADER ARMS

The FTX150-2 is the only dedicated machine in the class with loader arms

Increased productivity from the increased lift and range of motion

Range of motion gives operator more finite control over the mulching head, leading to increase in productivity

20" STEEL TRACKS

UNDERCARRIAGE

The D3 undercarriage in the FTX150-2 is designed for the toughest mulching applications, resulting in longer track life and less downtime

Ground clearance on the FTX150-2 is 21"

RHR5SD RIII I HOG

The BH85SD has a working with of 72" wide & is equipped with 36 cutting knives.

Mulch up to 10" diameter with ease.
