

Bobcat®

Sub-Compact Tractors

CT1021 | CT1025

One Tough Animal.

LIKE YOU, BOBCAT WAS BORN FOR THIS.

YOU MIGHT KNOW Bobcat Company from its iconic compact loaders and excavators: those tough, white-and-orange machines you see on countless construction sites and landscaping projects. But our first machine was literally born in a barn.

Designed for a turkey farmer, the original compact loader was destined to clean small livestock pens and stalls. Ever since, Bobcat® equipment has been a mainstay on ranches, dairies and all kinds of fruit, grain and vegetable operations.

The rural lifestyle is a piece of your identity. It's home. It's you. Bobcat shares your roots, and we're coming back to them in a big way – with a tough sub-compact tractor lineup. They have everything you need to turn the dreams for your land into reality.

*We love a good homecoming. So try a Bobcat sub-compact tractor on your property. It's all Bobcat. **And it's all you.***

PERFORMANCE

The more you do with your tractor, the more ideas you have for your property. Bobcat sub-compact tractors prepare you for every possibility.

ACCOMPLISH

MORE.

THESE AGILE MACHINES ARE STRONG

enough for your biggest jobs, but small enough to work inside and around sheds, barns, animal enclosures and anywhere else the work takes you. With models up to 24.5 hp, hydrostatic transmission, plus generous lifting ability, ground clearance and a powerful 3-point hitch with power take-off (PTO), Bobcat brings outstanding performance and value to your property.

From its wheel base to its length, tire options and overall engineering, your Bobcat sub-compact tractor feels dimensionally well balanced, powerful and capable while being responsive and comfortable to operate. With top travel speeds as high as 10.1 mph, you'll spend less time moving from one point to another, and you'll make every second count when you have work to get done. And because a hard-working tractor needs hard-working traction, you can easily engage four-wheel drive whenever the work demands it.

Hydrostatic Transmission (2-Range HST)

The hydrostatic transmission uses hydraulic pressure to change speed, operating similar to a vehicle. You'll only need to stop moving if you want to change your range. This is a good transmission choice if you're doing frequent front-end loader work, mowing or clearing brush as you maneuver through wooded areas. Its ease of operation also makes it a good choice for novice drivers. Forward and reverse are controlled by foot pedals.

Tight Turning Radius

Maximum maneuverability is the key to effective mowing, tilling and more. Bobcat sub-compact tractors feature a tight turning radius – as little as 8.2-8.3 feet – so you can move in close to trees, buildings and other obstacles.

Leading Drawbar Towing

Bobcat sub-compact tractors deliver leading drawbar towing power and force for heavy towing performance that beats many other tractor brands.

Hitch

The hitch provides towing flexibility and convenience.

Tire Options

Three types of tires are available for Bobcat sub-compact tractors. They offer a combination of reliability and ride quality to match the requirements of your work.

Agricultural Tires

These tough tires have deep lugs for optimal traction and self-cleaning in soft soil and mud. They also deliver more power to the ground when towing heavy loads or pulling implements.

Turf Tires

Turf tires are designed with less aggressive tread that minimizes disturbance on lush lawns and established landscaping.

Industrial Tires

Industrial tire tread is wider than agricultural tires, and the lugs are deeper than turf tires. They deliver great traction for all ground conditions and many different applications.

PROTECT YOUR INVESTMENT.

From the solid and sturdy construction of our 3-point hitches to our unmatched dealer support, your Bobcat tractor can stand up to a challenge.

Tier 4 Diesel Engine

The powerful Tier 4 engine offers robust, reliable performance for challenging work and reliable startups – plus low noise and vibration for optimal comfort.

Polymer Fuel Tank

A heavy-duty polymer fuel tank maintains fuel integrity and eliminates rust-related contamination.

Brush Guard

Included with the optional front-end loader, the heavy-duty brush guard protects your tractor's front end from debris, branches and other obstacles.

24-Month, 1,500-Hour Warranty

Bobcat Company stands behind your tractor. Our standard warranty provides 24 months of coverage from defects in material and workmanship or 1,500 hours of usage (whichever occurs first).

Your chores demand daily attention. Your tractor needs to be ready to work when you are. Bobcat sub-compact tractors are built to contend with the dust, dirt and grit of your toughest challenges, and they're designed with ease of maintenance in mind.

THE BOBCAT DEALER NETWORK ADVANTAGE

Bobcat built its brand on quality equipment serviced by reliable local dealers, with warranty repairs and parts availability that are second to none. With the help of our knowledgeable dealers, Bobcat customers have kept machines running for decades doing the toughest jobs imaginable. If you're looking for long-term service and support, take a look at Bobcat sub-compact tractors.

Minimize your maintenance.

You bring a tractor home to do work. It shouldn't be a job to keep it running. Maintenance points on your tractor are easy to find and reach – so upkeep is simple and takes less time. Flip up the hood – it opens nearly 90 degrees – to easily access the battery, filters and other checkpoints. Other components are simple to reach and service, allowing you to easily retain peak performance for years.

One-Side Maintenance

All daily checks, engine fluid fills and filters are located on one side of the engine, which makes it easy to keep your tractor running smoothly with minimal effort.

One-Piece Engine Hood with Air Cylinder Assist

There are no side panels to remove when you need to access your engine. It's as simple as lifting the hood. With the air cylinder assist, it takes little effort. When fully opened, the tractor's hood stands nearly perpendicular to the engine compartment. This provides best-in-class maintenance accessibility and makes virtually all of the major service points easy to reach.

COMFORT

ENJOY **YOUR WORK.**

When you have hours of mowing and acres of upkeep ahead of you, a comfortable tractor is a must. Bobcat sub-compact tractors offer outstanding features that make tough jobs comfortable and enjoyable. Intuitive controls that fit you naturally. A comfortable ride.

A quiet engine that helps you focus on the job. When the projects pile up, you won't mind spending extra time on this tractor.

Low Noise, Low Vibration

The engine in your Bobcat sub-compact tractor is designed to produce low noise levels with minimal vibration to keep you working comfortably and focused on the task.

Headlights

Bright headlights illuminate the job for high visibility for evening work and other low light conditions.

LED Tail Lamp

The LED tail lamp provides excellent visibility and long bulb life.

Panoramic Visibility

The open cab provides excellent sightlines to the work and great all-around visibility, with the additional simplicity and ease of use for operators who frequently get on or off the tractor throughout the day.

Comfortable Operator Station with Ergonomic Controls

The operator station on Bobcat sub-compact tractors is designed to enable hours of comfortable, confident work. All of your controls, gauges and buttons on Bobcat sub-compact tractors are thoughtfully laid out with your ease of use in mind. The illuminated dashboard allows you to operate and easily monitor performance in all light conditions.

Intuitive Control Levers

Great controls make it easier and more enjoyable to do more with your sub-compact tractor. You can match torque to the task with the HST range lever, moving effortlessly between high and low ranges. You can also adjust mid-mount mower cutting height via a simple lever control. Rear and mid-PTO levers enable you to engage or disengage the PTOs separately or together.

Foldable Rollover Protective Structure (ROPS)

The ROPS is designed to protect the operator in the event of a rollover (when the ROPS is locked in the up position and the seatbelt is fastened). The foldable ROPS can be temporarily lowered when driving under trees, into garages or in other low-clearance areas.

DO MORE

Throughout the day, you can go from mowing to grading to digging. Your property presents endless opportunities to get outside and get something done. From front to back, Bobcat tractors are well equipped to keep up with your to-do list.

with one machine.

Front-End Loader with Standard Quick Attach Mounting System

The front-end loader is a must-have for digging, dirt moving, loading and carrying material. On your Bobcat tractor, the front-end loader is easy to attach and remove, plus it delivers leading lift capacity and height for exceptional productivity.

Its quick attach mounting system enables you to use a variety of attachments, such as a grapple, pallet fork, combination bucket or angle blade. With a quick change, you can gear up for more tasks and bring more value and versatility to your property. Front-end loaders are equipped with float functionality to follow ground contours as you work.

Take on digging, loading and material handling with a strong, easy-to-use front-end loader. Handle mowing with the help of the standard mid-mount PTO. Finally, use an array of implements with your 3-point hitch and rear PTO. Your dealer can help you acquire a range of Bobcat implements for the work you do on your land.

Bent Lower Lift Arms

The lower lift arms provide a forgiving angled design that makes implement hookup quick and easy.

Flip-Up PTO Guard

The flip-up PTO guard ensures easy attachment installation while providing operator protection during use.

Mid-PTO

Enjoy superior maneuverability for mowing around trees, buildings and other obstacles with a 2,200-rpm mid-PTO and mid-mount mower. With a mid-PTO, you have the option of combining three tools on one machine – one in back, one in front and your mid-mount mower.

Rear PTO and 3-Point Hitch

The 3-point hitch is a key to your tractor's versatility. It enables you to do a large number of tasks on your property with both drag-behind and PTO-powered implements.

IMPLEMENTS **AND** ATTACHMENTS

YOUR SUB-COMPACT TRACTOR packs a lot of versatility for the price, and hard-working Bobcat implements and attachments are made to handle the numerous possibilities you uncover on your land.

Mid-mount mower

Front-end loader with standard quick attach mounting system

Backhoe

3 pt. auger

Bobcat provides you access to a world of Bobcat implements and front-end loader attachments – so you can get the most work from your tractor investment. Whether it’s installing a fence or taking care of animals, when you have the right tractor and the right implement or attachment, there is virtually no task that’s beyond your ability.

There are more than 550 dealer locations in North America, so you’re never far from an expert source of implements, attachments, accessories, parts and service.

*Note: Hydraulic 3 pt. lift capacity will vary depending on lift point height.

PIONEERING MANEUVERABILITY

Bobcat introduced its first compact loader in 1958, and two years later, the world's first skid-steer loader. This created an entire industry of machines that put the power of large equipment in a compact size with unmatched maneuverability.

OFFERING MORE VERSATILITY

In 1970, Bobcat invented the first quick-change attachment system for skid-steer loaders, known as the Bob-Tach® mounting system. Today we offer more compact equipment attachments than anyone in the world, empowering customers to transform all of our machines into multi-tasking attachment carriers and reach higher levels of production.

ONE TOUGH ANIMAL®

All over the world, Bobcat equipment is known for being durable and dependable. By lasting longer and minimizing downtime, we help our customers become as successful as possible.

HELP WHEN YOU NEED IT

With over 50 years of experience and more than 550 locations, we offer the best dealer network in the country for compact equipment. Our dealers offer a quality sales force, dependable parts departments and qualified service technicians, all leading to a quality customer experience.

A CONSTANT INNOVATOR

In the late 1950s, a turkey farmer needed help – so in 1958, we introduced what was to become the world's first skid-steer loader. We created an industry by listening to the needs of the customer. This focus is the same today. In 2000, a superintendent needed help – so we built the world's first Toolcat utility work machine. We continue to be a global leader in innovation by listening to our customers.

LEADER BY DESIGN

Listening to the customer and a pioneering spirit are why Bobcat continues to lead the evolution of compact equipment ...

- 1960** Invented the FIRST true skid-steer loader.
- 1970** Invented the FIRST attachment mounting system for skid-steer loaders.
- 1977** Built the FIRST skid-steer loader with no chain adjustments required. Still a Bobcat exclusive.
- 1981** Introduced the FIRST secondary restraint seat bar.
- 1983** Developed the FIRST skid-steer loader with a transversely mounted engine. Still a Bobcat exclusive.
- 1990** Introduced the FIRST compact excavator manufactured in the U.S.
- 1999** Introduced the FIRST compact track loader with a solid-mounted undercarriage manufactured in the U.S.
- 2001** Invented the FIRST loader with all-wheel steer and skid-steer capabilities. Still a Bobcat exclusive.
- 2003** Revolutionized the way the world works with the invention of the Toolcat™ utility work machine line, the world's FIRST utility work machines – a cross between a pickup, attachment carrier and utility vehicle. Still a Bobcat exclusive.
- 2006** Introduced the FIRST utility vehicle with RapidLink™ attachment mounting system.
- 2008** Introduced Roller Suspension™, the FIRST all-steel suspension system.
- 2009** Launched M-Series compact excavators and loaders.
- 2011** The M-Series loader models S850 and T870 became the largest and most powerful in the Bobcat product lineup.
- 2012** Bobcat introduced two new sizes of extendable-arm excavator options that are both attachment and clamp-ready.
- 2013** The M-Series 500 frame-size loaders replaced the popular S185 and T190 (among many others). This loader size is the most popular in the world and has been for two decades.
- 2014** Bobcat launched the 400 frame-size loaders, completing the M-Series line; manufactured its one-millionth loader; introduced its own Tier 4, non-DPF engines; and opened the Bobcat Acceleration Center, a dedicated innovation, testing and technology facility.
- 2016** Launched the M2-Series loaders.
- 2017** Launched the R-Series excavators.
- Today** There are more Bobcat skid-steer loaders at work around the world than all other brands combined.
- Today** Bobcat manufactures more attachments than anyone in the world.
- Today** Bobcat is the only company that offers operator training kits for compact equipment.
- Today** Bobcat offers a full range of extendable-arm options, three sizes fitting five different excavator models.
- Today** Compact track loaders are rapidly becoming the product of choice in many market segments.
- Today** Launch of the compact tractor.

BOBCAT TIMELINE

YOU ARE ONE TOUGH ANIMAL.

Everything we put into Bobcat equipment is designed to make more of whatever you bring to the job. Whether it's strength, versatility, speed or agility, it's built around you.

Certain specification(s) are based on engineering calculations and are not actual measurements. Specification(s) are provided for comparison purposes only and are subject to change without notice. Specification(s) for your individual Bobcat equipment will vary based on normal variations in design, manufacturing, operating conditions, and other factors.

Bobcat is a Doosan company. Doosan is a global leader in construction equipment, power and water solutions, engines, and engineering, proudly serving customers and communities for more than a century.
