Downloading and connecting of smart watch with **Da Fit APP**.

- 1.Download and install Da Fit APP
- 2.Scan QR code with mobile phone to download APP.

Da Fit

Android system, select Google Play to download and install Da Fit App. Or scan QR code to download.

Connect smart watch with Da Fit APP.

Click on "Add Device" to connect the smart watch.

The device has been connected Successfully.

For both android & iOS
click on **Notifications** Tab
in the Dafit app.

Enable all the notifications
for the ease of use.

Bluetooth calling function

This watch comes with a special feature of Bluetooth calling. The user can make calls without having to open the phone. You can also view the call history of the watch. You need to keep the connection between the watch and the phone stable when using the Phone Call function. The watch also has a microphone and a speaker built in for the ease of talking through the watch and to hear music, phone calls, and other notifications

Follow the steps to activate the calling function and much more.

Part A - How to connect

Step 1: After connecting the watch to the Da Fit App, you will get a notification on the watch to pair for bluetooth calling connection automatically.

For iOS

After the watch is connected, the prompt for pairing with the mobile phone will pop up for the first time after 3 seconds, and the prompt for connecting the phone and pushing information will pop up for the second time after 3 seconds.

It will show
Connected For iOS.

For Android

Accept the Bluetooth Pairing Request.

Once accepted you can see the following screens saying - **"Connected for calls & audio"**.

- **Step 2:** Go to the watch and press the home button to view the menu to see calls option.

After successfully connecting the bluetooth you will get this screen.

Upon clicking on the call record you can see the recent calls of your device.

When you click on the dial pad you shall get this screen on your watch.

When you dial the number you shall get the call button activated.

You click the dial button, you can see that the number is dialling.

Through the microphone available in the watch you can talk through the watch and adjust the speaker volume by the + & - sign on the watch and disconnect the call.

Part B - How to disconnect

To disconnect the bluetooth calling the user simply has to go to the phone's bluetooth setting and **"unpair"** the **CB-AURA** device.

Part C - Add contacts

You can add upto 8 contacts - Add the contacts from the Da Fit App. Go to "Frequent Contacts" and add contacts. The selected contacts will get synced to your watch.

Click on Favorite Contact to add the contacts.

Select the contacts you want to add.

The contacts will get added.

Part D - Switch between Phone / Watch

Switch Between Watch / Phone During an Active Call :
If your watch is connected to the Phone via Bluetooth, all calls will come on the watch by default. If you want to change the call to the phone, during an active call, simply click on Handset earpiece icon to select it. the call will then come on your phone.

Part E - Battery Advisory

- The battery lasts for 3 to 5 days with bluetooth calling mode enabled.
- If the bluetooth calling mode is disabled then the battery can last for 7 days.
- On standby the battery can stay for as long as 20 days.
- Advisory- To conserve battery, It is advised to turn off the bluetooth when not in use.

Replace the Watch Face on the Watch: Long Press the screen, you shall get the options to change the watch face, scroll left and click on the watch face you want to select. The watch face will set.

Replace the Watch Face on the Watch: Tap the Watch face settings entry in the "Device" -> "CB-AURA" page, and then download and sync watch faces on the Dial Market. After that, the replacement is done.

Tap the Watch face settings entry in the "Device" -> "CB-AURA" page, and then download and sync watch faces on the Dial Market. After that, the replacement is done.

Notifications

Enable Notifications

During use, you need to enable the corresponding "App alerts" on the Da Fit App, and keep the watch and the mobile phone connected. If you are using an iOS device, you need to pair the watch with the Bluetooth of the mobile phone before use.

If you are using an Android device, you need to include the App into the whitelist or self-starting list of the mobile phone in background settings and keep the App running in the background to protect it from being detected and killed by the mobile phone's background processes. Such background processes could disconnect the watch and the App, and as a result no reminder will be received. See "Device" -> "Permission Settings" -> "Background Run Settings" for different mobile phone systems.

View Notifications

When the watch receives a notification alert, it will vibrate to remind you and automatically display the notification content. If you do not view the notification immediately, you may slide up in the watch face page to go to messages and check the notification.

Weather

In the weather page, you can view the weather for the day and the weather information for the next 5 days. You can change location in the app.

The weather displayed by the watch comes from the server.

Therefore, you need to keep the Bluetooth of your mobile phone on and connect it with the watch to keep abreast of the latest weather information changes.

Settings

In the settings page, the settings items like Display, Vibrate & Ring, DND, Low Power Mode, Phone, Phone Reset, System, About are provided.

Display

You can view and change all the display related settings in this.

Vibrate & Ring

You can view and change all the display related settings in this.

Do Not Disturb

This puts the watch to DND mode, there will be no notifications.

Low Power Mode

This will dim the brightness and shut the vibration

Phone

This function will tell you if the phone connection is on

Phone Reset

This will reset the bluetooth calling function.

System

This feature will show you options to reset, restart and shut down the device

About

View the version details about the watch in this tab

Watch Status Reminder Incoming

When the watch receives incoming calls in no bluetooth calling mode, it will vibrate to remind you, also you can silent or reject the call.

Idle alerts

When you are sitting for a long time, the watch will vibrate to remind you to get up for a while. Before using this function, you need to enable Idle alerts by tapping "Device" -> "Heath Reminder"-> "Reminder To Move" and setting time for Sedentary alerts on the Da Fit App.

Goal Notifications

When the number of steps reaches the set goal, the watch will vibrate to remind you. Before using this function, you need to enable Goal notifications by tapping "My" -> "My Achievements" and set your goal on the Da Fit App.

Introduction to the Training Function Start Workouts

There two approaches to starting a workout:

- Select a workout type in the Activity entry and enable it;
- Short Press the functions button to enable GPS exercise

CHARGING GUIDELINES

- Use only 10W adapters for charging your smart watch.
- Caution against using high-power mobile adapters (beyond 10W), as this may lead to charger faults.
- Using adapters with higher power ratings can result in malfunctions and reduce the lifespan of device and your chargers.
- Users can contact customer support for any further assistance or clarification on concerns related to charging and power adapters.
