## Watch Functions

### Always On Display

After the watch is connected to the App, you can turn on the Always on display in the settings > Display > AOD Clock > You have 2 options – Analog / Digital Screen for AOD.

## **Alarm Clock**

After the watch is connected to the App, you can set a single alarm, the cycle of the alarm, and also up to 5 alarms in the App terminal.

## **Stopwatch**

Click the start button to start the timing, click the pause button to stop the timing, click the reset button to return the timing to zero.

A maximum of 10 records can be saved.

## **Breath training**

During breath training, there are 2 options – 1 & 2 mins.

Users click on the corresponding time to perform breath training. After click Start, follow the icon in breath training to zoom in and breath in, zoom out and breath out.

## **Blood Pressure**

When entering the blood pressure measurement interface, the green light at the bottom will start the test and there will be a vibration reminder,

when the measurement is completed within 30 to 60 seconds. The measurement is based on PPG technology.

### **Women's health**

After the watch is connected to the app, Women's health alert can be enabled on the app to view the information on the watch.

### **Heart Rate**

When you enter the heart rate measurement interface, the green light at the bottom will start to measure. When the measurement is completed in about 40 seconds, there will be a vibration reminder. If the message "Please wear the watch correctly" is displayed, you need to wear the watch again.

### **Blood Oxygen**

When entering the blood oxygen measurement interface, the red light at the bottom will start the test for 30 to 60 seconds and there will be a vibration reminder when the measurement is completed. The measurement is based on the PPG technology.

## **Weather Forecast**

After the watch is connected to the app, this weather interface will display the real-time weather temperature and the weather for the next three days

## **Messages**

After the watch is connected to the app, open the push of relevant information on the app side, the watch side can receive the corresponding push message, and up to 15 recent messages can be saved.

## **Setting**

The settings function includes the screen display (switch dial, duration of light, brightness adjustment, duration of wrist flip), language, sound & vibration, menu style, battery, password, QR code, system and time settings.

## **Music**

When the watch is connected to the app, you can control the pause and start of the mobile music player, adjust the volume and switch songs.

## **Timer**

In the timing function, the system preset the common timing duration. You can click the corresponding duration to time quickly or click the custom button to set the time. Click the Start button to start the timing, click the pause button to pause the timing, Click the reset button time reset.

## **Sleep**

The watch displays total sleep duration as well as light and deep sleep duration of the previous night, and the sleep screen slides up to show sleep data generated in the last seven days.

## **Calculator**

On the menu screen, click Calculator to enter the function screen of Calculator. On this screen, you can do basic calculations like addition, subtraction, multiplication and division.

## **Find my Phone**
