System Requirements: Android 5.0 and above, iOS 9 and above, phone supports for Bluetooth 5.0 and above

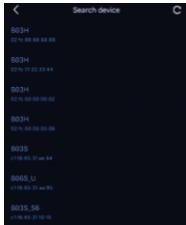

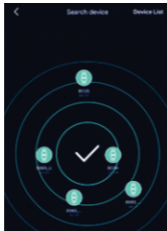

Download on the
App Store

Android App on
Google Play

SCAN THE QR CODE
TO DOWNLOAD
THE APP :

Click on "MY" section to connect the smartwatch.

- Click on Search Device & then Click on Ignite Cube in the device list
- For iOS, search 'HryFine' in App store.
- For Android, search 'HryFine' in Play store, to download & install the app.

Note: your mobile phone must support Android 5.0 or IOS 9 or above, and Bluetooth 5.0 or above.

Connect smartwatch with the App

- Click on "Add Device" to connect the smartwatch.
- Click on your device in the scanned device list.
- The iOS devices will show a Bluetooth pairing request and you can click on Bluetooth pairing to confirm. Android devices connect directly.
- The smartwatch is now successfully connected with your device.

Calling Mode

1. To activate calling in your **Ignite Cube**, Please turn on the calling mode from the setting menu.

2. Phonebook: In *Hryfine* application, under "SET" click on frequent contacts, you can store upto 8 contacts from there in watch

How to connect watch to Calling mode

After turning on the calling mode of your watch, open the phone's Bluetooth settings and scan for **Cube_Audio**. Tap on the name to connect.

Function Description

- Long press the home button to switch on/off the device.
- Swipe Right or left to change the watch face
- Slide down: display message content.
Slide up: enter quick menu
- On standby, tap on the screen to enter main menu
- The reset device feature clears all data in the smartwatch and restores factory settings
- To enter calling mode, turn on calling mode from settings

Interface

 **Tracks Step**
You can track the number of steps, distance travelled and calories burnt.

Number of steps

Wear the smartwatch and record the number of steps you take

Distance

The distance of motion is estimated based on the number of walking steps

Calorie

Estimate the calories burnt based on the number of walking steps

 **Health**
This interface is to track the HR, BP and Blood Oxygen Level
After swiping to the "health" interface for a few seconds, the current heart rate, blood pressure, and blood oxygen level results will be displayed on the screen

 **Multiple sports modes**
This interface is to track and monitor physical activity and workouts through the 11 pre-defined sports modes. You can monitor your workouts accurately and keep a check on your calorie burnt.

 **Notifications**
Ignite Cube is capable of pushing multiple message alerts & reminders

APP function and settings

Alarm setting

In the connected state, 8 alarms can be set. After setting the alarm, it will be synchronized to the smartwatch. Ignite Cube supports offline alarm also. After syncing the alarm with the smartwatch through the app, it will function even if the tracker is not connected to the app

Sleep mode

When you fall asleep, the smartwatch will automatically enter the sleep mode and will automatically detect and monitor your sleep pattern (deep sleep/shallow sleep/wake up) all night to accurately calculate your sleep quality

Remote photography

In the connected state, start the photo from the smartwatch or the APP to enter the remote camera interface. Shake the smartwatch to remotely click photo automatically. Please allow the APP to access the photo album to save the clicked photo.

Sedentary reminder

By setting the Sedentary reminder function on, you can choose to get reminded by the tracker to move around when you are sitting for a longer time.

Find your smartwatch Function

In the connected state, click the "Find My Tracker" option and the smartwatch will vibrate.

Raise your hand to awake

On Standby, when you lift your wrist and turn the screen, it lights up to show time

Do not disturb mode

Turn on the Do Not Disturb mode. You can set the Do not disturb time period. During the set time period, the smartwatch stops receiving notification and messages.

Device reset

This feature resets the smartwatch to factory settings and erase all the previous data/information

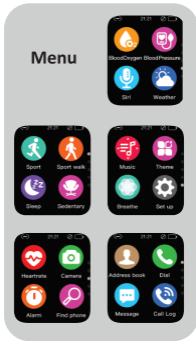

Remove device

This feature will erase data from the app and remove the device

Other information

When there is a call, message or other reminder the smartwatch will vibrate.
