ROADEYE NEO USER MANUAL

Overview

①	Power key /Lock	④	TF card slot
②	video Microphone	⑤	Power interface (Mini
③	Reset Key	⑥	USB) Camera lens

Installing Memory card

1. With the Car DVR turned off and the screen facing towards you insert the SD card into the TF card slot on the right of the Dashcam. Push the SD card in until a “click” is heard.
2. To remove the card, gently push it until it pops and pull it out of the slot.

Note:

1. Do not insert or remove the TF card when the dash cam is powered on to avoid breakage of the card.
2. Please use a class 10 micro SD card from 32 GB to 256 GB.
3. Format the memory card before use.

Dash Cam Installation

1. Slide the mount into the mount installation slot.
2. Turn off the car engine.
3. Stick the car mount together with the camera on your windshield.
4. Connect the USB charging cable to the mini USB port of the dash cam. Run the cable along the edge of the windshield. Tuck away in the seams and extend it all the way to the USB port of the car charger. Be sure to keep it away from the airbag area.
5. Adjust the dash cam to keep the lens level with the ground.
6. Start the engine to check if the dash cam works properly.

Power and manual Operation

Power on the car camera.

The blue light blinks up to Show that the car camera is on.

Manual power operation

1. Plug in and the power will turn on
2. Unplugged, the power will turn off.
3. When you press power key once, the power will turn on .
4. When you long press power key again, the power will turn off.
