B10

Our mission when developing the B10 was to create a platform for safe, fun urban mobility inspiring people to ride the urban jungle with confidence and control. We believe that our goal has been achieved.

In order to take the humble scooter to the next level, we chose first to go back to basics, starting with a timeless clean design, and when combined with our proven automotive knowledge, this created the base for the B10's outstanding performance.

Featuring an intuitive, stable steering geometry, robust yet resilient frame, integrating, cutting edge battery and drive train technology to ensure a new standard of durability, and the ultimate ride every time. If you are looking for the next generation of scooter technology, look no further.

BIO PROXI

Maximum speed: 35km/h

Maximum range: 25km

Charging time: 6 hours

Weight: 14kg

Tires: F-10" R-10"

Brakes: Tektro hydraulic system F-140 R-160

Weight: 14kg net

8Tev STRENGTHS

- **Prestige Design**- our sleek, chic, clean look, back to basic is timeless.
- **Top of the range product** and leaders in technology.
- **Safety**- durable and sturdy, with a minimum presence on the road, not Inadequate 'toy-like'.
- **Lightweight**- all our micro EV are extremely light weight, no more than 30kg (even the 4 wheeler!)
- Develop and **innovate** new models and technology in all the range of products .
 - **Go green consideration** is our top priority to help our planet and strive for greener alternatives.
