HOW TO USE THE OSTOFORM SEAL
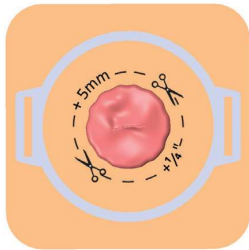

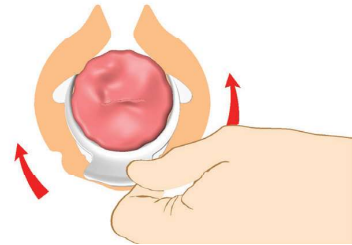

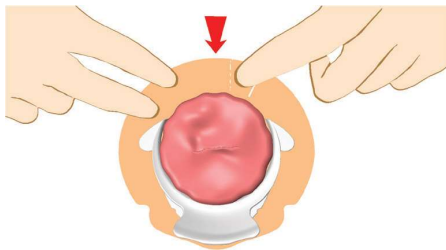

Step 1

Cut the pouch or wafer opening to stoma size + ¼ " (5mm)

e.g. for a 1" stoma, cut the pouch opening to 1 ¼ ".

Step 2

Position the spout below the stoma

or rotate to align with the direction of output.

Step 3

Wrap around the stoma and overlap the tabs
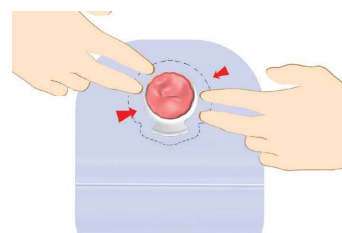

to ensure a complete seal.

Step 4A

For secure 2-piece pouch attachment, position the baseplate

over the Seal first, ensuring that the spout passes through

the opening. Then, secure the pouch to the baseplate.

Step 4B

For secure 1-piece pouch attachment, ensure the spout is

fully inside the pouch opening. Then, pull the pouch up into

the slot underneath the spout.

Step 5

Press the pouch adhesive against the Seal

and skin to achieve secure adhesion.
