

Mediterranean Facial Masque

with Katari Argil, Hoba, Roseau & Barie

ANTI-AGING | DETOXIFYING | FIRMING

TREATMENT PROTOCOL:

TREATMENT TIME: 60 minutes

PRICE: varies

APPLICATION TECHNIQUE:

1. Mix 1 part Argil and 1-2 parts warm water in non-metal bowl with non-metal utensil. Mixture should not be runny but rather 'guacamole consistency'. Add water slowly while mixing.
2. Add 1-2 drops of oils (Katari Hoba or Argan) for extra moisturizing effect (optional).
3. Add additional ingredients for extra benefits - honey, cocoa powder for blackhead extraction, etc.
4. Remove make-up and cleanse face with Hoba oil
5. Apply steam or warm up skin with a warm towel to allow masque to penetrate into skin better

6. Apply Argil masque to face avoiding areas under eyes with a brush

7. Leave masque on for 5-10 min until almost dry

8. Remove Argil masque with gauze pads (using multiple pad - fresh one on each pass is great)

9. Follow up with a steamy towel after bulk of product is removed if extraction is next, otherwise...

10. Complete the masque with Katari Barie (Vitamin E, collagen replacement) skin serum to condition skin and provide anti-aging benefits

PRO TIPS:

- ▶ don't mix Argil with / in metal accessories

▶ works great before extraction due to amazing pulling power

▶ use Roseau (Katari rose water) before masque application and after to tone skin

INGREDIENTS: 100% pure Tunisian green clay (Argil); naturally antibacterial, pH-neutral, non-abrasive, no dyes or preservatives

WARNINGS: redness after masque is rare but normal due to Argil's strong drawing power; breakouts are rare but might happen due to skin oils being drawn to the skin surface

SKIN TYPES: all

FREQUENCY: 1-2 times a week or spot application as needed
