Quality Asphalt Products *Reliable, maintainable, and sustainable asphalt products.*

Gardner Asphalt Supply, LLC was formed in September 2011. Its parent company Gardner-Gibson has been in existence for four decades producing a full line of roofing coatings, waterproofing coatings, pavement sealers, caulks, wall repair patching, and wall paper adhesives through 12 owned and operated manufacturing plants across the United States. The creation of Gardner Asphalt Supply was a natural fit for the company because of its asphalt based products. Gardner Asphalt Supply, LLC focuses on the supply and distribution of paving asphalts including cutbacks, water based emulsions, warm mix, ground tire rubber, and polymer modified asphalts.

Our Products

- Emulsions
