

# Birthday Cupcake Instagram Grid Puzzle Template

**This template is for Canva. In order to use it, you will need an account at Canva.com.**

**1.) To access the template, visit this link:**

**<http://bit.ly/bdaygrid>**

**2.) In the Canva editor, look for the Uploads icon. Select the photos you would like to use from your computer and upload them.**

**3.) From the Uploads panel, select the image you want to use and drag & drop it into the frame you want to fill on the template.**

**4.) To edit the text, click on a text area to replace or delete any of the text. Adjust font sizes and tweak text location as needed.**

**5.) When the photos and text are all updated, download the completed image as a JPG file.**

**After the filled template has been saved, you will need to separate it into 6 individual squares. There are many apps that perform this function! I use Giant Square; Grid Post is another popular option.**

**Export the chopped-up image to your camera roll. The puzzle grid is ready to upload to Instagram!**

**Be careful to post the images in the proper order. I recommend the use of a grid planner app to get all of the images assembled properly and uploaded efficiently.**

**Thank you for purchasing this template! Your support helps me create future projects!**
