GENERAL INSTRUCTIONS

Best results are obtained by applying the product to cool, wet soil. Mixing prior to pouring, shake container vigorously, then add the required quantity of ProForce CHECKPOINT 500 SC Herbicide to water in the spray vat while stirring or with agitators in motion. DO NOT mix with other pesticides.

RESISTANT WEEDS WARNING

ProForce CHECKPOINT 500 SC Herbicide is a member of the benzamide group of herbicides with inhibitors of microtubule assembly mode of action. For weed resistance management this is a Group **D** Herbicide. Some naturally occurring weed biotypes resistant to CHECKPOINT 500 SC and Group **D** Herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by CHECKPOINT 500 SC or Group **D** Herbicides.

GROUP D HERBICIDE

Since the occurrence of resistant weeds is difficult to detect prior to use, Indigo Specialty Products Pty Ltd accepts no liability for any losses that may result from the failure of CHECKPOINT 500 SC Herbicide to control the resistant weeds.

Advice as to strategies and alternative treatments that can be used should be obtained from your local supplier, consultant, local Department of Agriculture, Primary Industries Department or an Indigo Specialty Products representative.

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS

DO NOT apply under weather conditions or from spraying equipment, that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures.

PROTECTION OF LIVESTOCK

DO NOT graze sheep, on treated areas or feed to poultry or pigs.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways by cleaning of equipment, disposal of wastes or used containers.
