

ANGLE SIGHT 4"

Macquarrie's Dual – Axis Inclinometer provides configurable pitch and roll measurements via an industrial grade, transfective monochrome display for superior visibility.

Tough & Rugged

Designed with harsh industrial environments in mind, the display is encased in a rugged, weatherproof fascia, with an adjustable gimbal mount for optimum positioning for operators.

Customisability

The integrated keypad allows for easy customisation of the display settings including warning and alarm setup, minimum and maximum tilt range and sensor customisation.

Warnings & Alarms

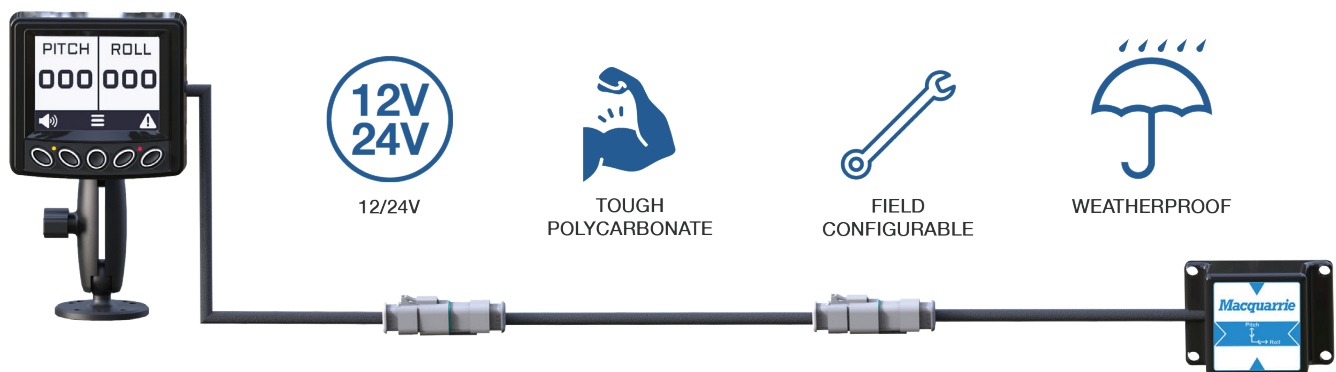

Integrated Alarm and Warning Outputs provide a switched, low side signal. Both Warnings and Alarms can be configured to be normally on or normally off outputs.

Password Protected

Password protection on the display menu can be configured by the user.

PROTECT YOUR MACHINERY AND INDUSTRIAL ASSETS FROM ROLLING OR OVERTURN
