

SENQUIP: Revolutionizing Remote Control

Harness the power of control with Senquip, the cutting-edge telemetry system tailored specifically for mobile machinery, engines & generators.

Experience seamless operation, an intuitive interface and advanced technology.

Precision Measurement

Built-in sensors allow you to track GPS Location, Speed, Pitch & Roll, Vibration, and other key parameters

Engine Diagnostics

Real-time monitoring capabilities give complete visibility of all engine data and fault codes, anytime, anywhere.

Efficiency Boost

Maximize productivity and minimize downtime with historical data, interactive graphs, and SMS / Email alerts.

Adaptive Control Technology

Tailored remote control commands allow you to start, stop, change RPM, track service history, and more.

SENQUIP: Revolutionizing Remote Control

Senquip uses Wi-Fi, 3G, 4G, and 5G to deliver next-generation connectivity

Anytime, Anywhere

Powered by **Macquarrie**

Environmental	Weatherproofing: IP67 Temperature: -40 to +85°C
Hardware	Kitted solution arrived "Plug & Play" to connect directly into your engine, controller, or machinery
Notifications	Customisable Email / SMS Alerts allow users to get instantaneous notification of engine status, fault codes, and more
Control	Remote control allows for Start, Stop, RPM INC, RPM DEC, and more.
Configurability	User Configurability Allows web interface to be tailored to your needs
Endpoint Agnostic	Data can be sent directly from your device to your SCADA system or fleet management software

Customer to supply their own data capable, Micro SIM Card.

STANDARD	MICRO	NANO
		
25MM X 15MM	15MM X 12MM	12.3MM X 8.8MM

Subscriptions are managed directly VIA the portal, take the power into your hands:

Basic	Premium
