

OIL QUALITY MONITORING

- REDUCE NUMBER OF OIL CHANGEOVERS
- SIGNIFICANT COST SAVINGS AND OIL USAGE
- IMMEDIATE NOTIFICATION OF CONTAMINATED OIL
- INCREASED PREVENTATIVE MAINTENANCE
- REDUCE DOWNTIME
- ELIMINATION OF LIVE WORK

MEASURE KEY OIL QUALITY PARAMETERS:

- Oil viscosity
- Oil Density
- Dielectric Constant
- Oil Temperature

PROTECT YOUR ASSETS WITH PREDICTIVE MONITORING OF MACHINE OIL LIFE

The Oil Property Remote Monitoring Kit from Macquarrie Corporation allows you to remotely predict remaining oil life in your assets.

The data can be remotely viewed VIA the web-platform, on your PC or phone – and the systems enables you to optimise your oil change intervals, minimize risk of dramatic engine failure, and significantly reduce maintenance costs.

Immediately eliminate regular and unnecessary changeouts, and remove any need for a manual oil-sampling processes.
