## SENQUIP: Revolutionizing Remote Monitoring

Harness the **power of control** with Senquip TPMS, the cutting-edge **T**yre **P**ressure **M**onitoring **S**ystem tailored specifically for machinery, buses, trucks & more.

Experience seamless operation, an intuitive interface and advanced technology.

Precision Measurement
Built-in sensors allow you to track GPS Location, Speed, Pitch & Roll, Vibration, and other key vehicle parameters

Engine Diagnostics
Real-time monitoring capabilities give complete visibility of all tyre data and vehicle data anytime, anywhere.

Efficiency Boost
Maximize productivity and minimize downtime with service planning tools, cost calculators, & SMS / Email alerts.

### Adaptive Control Technology
Proprietary software algorithms allow complete visibility of tyre **pressures**, **temperatures**, **tread depth**, and more.

REMOTE MONITORING & TPMS SYSTEM

Macquarrie

Senquip uses Wi-Fi, 3G, 4G, and 5G to deliver next-generation connectivity. Anytime, Anywhere

MULTI-PLATFORM
VIEW YOUR ASSETS ON PHONE, TABLET, LAPTOP OR ANY OTHER CONNECTED DEVICE

WI-FI   4G/5G

TYRE SENSOR
SMART SENSOR WITH 5-7 YEAR BATTERY LIFE

TYRE MOUNTED
INTERNAL TYRE MOUNT FOR LONGER LASTING INSTALL

BLUETOOTH CONNECTIVITY
NEXT-GEN BLE CONNECTIVITY PROVIDES BETTER UPTIME THAN RADIO TRANSMITTERS

Environmental	Weatherproofing: IP67 Temperature: -40 to +85°C
Hardware	Kitted solution arrived "Plug & Play" to connect directly into your mobile machinery, bus, or on-highway equipment
Notifications	Customisable Email / SMS Alerts allow users to get instantaneous notification of tyre wear levels, pressures, and temperatures
Configurability	User Configurability Allows web interface to be tailored to your needs
Endpoint Agnostic	Data can be sent directly from your device to your SCADA system or fleet management software

Customer to supply their own data capable, Micro SIM Card.

STANDARD	MICRO	NANO
25MM X 15MM	15MM X 12MM	12.3MM X 8.8MM

Subscriptions are managed directly VIA the portal, take the power into your hands:
