

The KIWIBEAT MUSIC 101 Headphones have an attenuated volume feature to ensure the volume level is not above that of the recommended guidelines; helping to protect your child's ears and assisting in the prevention of future hearing loss. The Kiwi beat headphones protect your hearing while still delivering outstanding sound quality up to 85dB SPL. The thick cable is directed through one side of the headphones to prevent tangling and strangulation. Compatible with most smart phones and audio devices!
