### KEY FEATURES

**FULLY ENGINEERED:** DECKED is engineered with a galvanized steel skeleton in-molded to High Density Polyethylene (HDPE)

**STRENGTH-TO-WEIGHT:** 900kg payload, 90kg per drawer capacity at an overall weight of 90-104kg

**CUSTOM FIT:** Each DECKED system fits your bed like a glove. CAD engineering data is used to match the sidewall topography of your truck bed and van body

**EASY TO INSTALL & REMOVE:** DECKED attaches to bed tie downs and cargo attachment points with little to no drilling of the vehicle required for easy installation and removal/replacement

**RECYCLED MATERIALS:** 100% recycled (HDPE) and American steel

**MADE IN USA:** Engineered in Detroit, manufactured in Ohio

**ERGONOMIC:** Drawers roll tools and other essentials out at waist height

**WEATHERPROOF & DURABLE:** Drawers keep contents dry and out of the elements. (HDPE) is impervious to the elements and unaffected by solvents, lubricants and other chemicals

**SECURE:** With the tailgate closed and locked, drawers are inaccessible and unable to be opened

**FULL BED USE:** By raising the bed floor of the vehicle over the wheel wells, the 900kg load rating makes the entire footprint of the bed available for carrying loads on a single flat surface

**CUSTOMIZABLE STORAGE:** We've developed a full collection of accessories to help you get more out of your system. DECKED is also compatible with a variety of integrations such as crossover toolboxes, ladder racks and cargo slide systems
