

PROTOCOL IDENTIFICATION AND READING

A) Connect the OBDII/diagnostic cable to the device and to the plug of the vehicle*.

B) Wait for the correct identification of the communication protocol for the vehicle. Follow the guided procedure on the display of the unit.

C) After the correct identification of the protocol proceed with the reading (or identification only) of the software stored in the vehicle ECU/DME, always following the guided procedure on the display of the unit.

*Please unplug the XTREME Performance Tool device from your vehicle before plugging the USB cable to your PC.

Before installing the software, ensure you have the following:

- Windows 7/8/8.1/10/11 (32-64BIT).
- Latest Windows Update.
- Antivirus software turned off.
